resign over Bill"

to take a different view on particular points," he said. Asked whether he would consider his position if the Commons upheld changes made in the Lords. Mr Jenkin question and one on which 1. would not be expected to comment.

The main criticism of the plan for nominated bodies has been that in London, it would have the effect of changing the

political complexion of the authority from Labour to Conservative without an elec-

government reorganization. In the metropolitan counties it appeared there would be no change of political control during the interim year, the change in London would occur because the borough elections held more recently than the last GLC elections returned more Conservative than Labour boroughs. He said the only way of retaining Labour control in the nterim authority would be to allow the minority of Labour boroughs to nominate the majority of GLC seats. "I do

tion. But Mr Jenkin said that to allow the councils to run on for a further year, as some people were urging, would still mean

peers describing the Bill as a dangerous precedent. Some Conservative and a number of cross-bench peers are expected to support it. Leading article, letters, page 13

End of the line for Russian marriages

means about 200 hours queue-ing a year for the average adult. Some authorities put the figure at more than 300 hours a year. "How many family conflicts could be avoided", wrote a reader from Lyov, "if only we could buy basic goods close to bome, get a decent meal out, or have our laundry done and shoes repaired quickly."

The problem is taken scriously in a country whose divorce rate appreaches 50 per cent, with about 950,000 divorces a year. The causes, Pravda said, were not only eademic shortages and poor services, or the lack of up-to-date household devices, but also the chanvinistic attitudes. of Russian men. In the Seviet

charriest piggery - me expect their wives to do all the cooking cleaning and shopping and take care of the children. Meanwhile, the husbands - as the weekly Nedelva recently documented - come home tired, get drunk and watch television.

There is little hope the future since, according to Pravda, traditional seciet attitudes are traditional sexist attitudes are being passed on to the younger generation. Very few Russian boys are taught to cook or clean, or are given any idea that they should help with houshold chores when they get married. Or as Nedelpo put it, it is not enough for Russian men to give their womenfold flowers once a warried on Womeney. They year on Womens Day.

Employers and TUC plan joint jobs study

TUC leaders are planning bilateral talks with the Confederation of British Industry (CBI) as the union boycott of the National Economic Devel-

opment Council continues.

Mr. Len Murray, General
Secretary of the Trades Union Congress and Mr David Basnett, chairman of its influential economic committee, have had preliminary discussions senior figures at the with employers' organization, it is expected that the arrangement will be put on a more formal footing later this month.

Propsals on these lines are contained in a confidential policy paper to be discussed by the economic committee on Wednesday, but there may be a revolt among some left-wing unions who fear the idea may be a manoeuvre to get round the boycott of "Neddy".

The TUC's team of six was withdrawn from the NEDC in February this year in protest at the forced de-unionization of the government communications headquarters at Cheltenham, and is not likely to take any further part in the NEDCs

work before the September Congress in Brighton.

But the paper before the meeting on Wednesday argues that there is some common ground between the CBI and the TUC, including a study of where new jobs might come from which was originally set in hand at the NEDC.

The two organizations are also

The two organizations are also pressing the Government for increased public investment in infrastructure such as new roads and replacement of worn-out public utilities such as sewerage.

The meeting due to take place later this month between the two sides will lead to a report to the General Council of the TUC next month, when a decision will be taken whether to intensify these bilateral relationships and determine what to tell the September congress.

Unions try to head off top vote By David Felton, Labour Correspondent

Union leaders were last night nouting an atempt to aviod the prospect of a politically divise election for successor to Mr Len Murray as General Scertary of the Trades Union Congress by swinging right-wing support behind the left's candidate. Left-wing support, led by the

Transport and General Workers Union is behind Mr Norman Willis, who holds the number two job at Congress House, while the only contender for the right to back is Mr David Lea, one of the TUC's assistant general secretaries.

A crucial meeting of the leadership of the engineering union, the second biggest, is expected to decide tomorrow whom to back but last night Mr Leif Mills, the banking union leader, declared himself in support of Mr Willis in the hope of encouraging other right-wing leaders to opt for Willis and The Institute, which in the avoid an election.

ast has been an influential Mr Mills, general secretary of

the Banking, Insurance and Finace Union, said: "I believe he is the right man for the job even though he backed by some of the left."

Clearer law sought on pensions The TUC yesterday called for

a new Pensions Act, and revision of trust laws governing dence to the Government's inquiry on pensions (Nicholas Timmins writes).

The new Act should have a clearer legal definitions of the rights, powers and duties of frustees, requirements to dis-close information to members of pension schemes, and requirements to ensure equal status for men and women and fair treatment of early leavers from pension schemes.
In addition, the TUC wants trade unions to have the legal right to 50 per cent partici-pation on trustee bodies, includ-ing investment committees.

BR faces severe Clash over **Inter-City cuts** marauding golden eagle

By Michael Baily, Transport Editor
British Rail's Inter-City network faces a severe reduction in destinations, services would in 1986 unless the Government agree to less stringent financial targets. Regular high speed trains could be replaced on many routes by less frequent

stopping services involving in some cases changes of train. The Inter-City network, which extends to Edinburgh, Glasgow, Cardiff and Plymouth, together with the crosscountry service from Newcastle to Cardiff and onward trains to Aberdeen, Inverness, Holyhead, Fishguard, Penzance, Hull, and Grimsby could be cut back to Newcastle, Glasgow, Cardiff,

and Bristol. Sheffield and Nottingham might be served by connecting trains from the east coast mainline. The direct route to Taunton and the West Country would terminate at Reading or

Newbury. While some through trains

many cases be run by local shuttle trains connecting with Inter-City at the main rail

British Rail, which refused yesterday to comment, is extremely reluctant to embark on such a damaging cutback but the financial target for Inter-

City may force it.
Inter-City, which is required to make a profit by 1986, lost £160m last year on a turnover of £440m. Such a turnround is not possible without a large reduction in services, fewer trains, a smaller network or

If service frequency is reduced, trains will become more crowded and the intervals

between them longer.

If high density services are confined to the truncated high density routes, the services beyond the Inter-City railheads deteriorates.

Farm shops praised for offering cheaper food

Geoffrey Rolstone can expect up to 15,000 visitors a day to his farm shop, or picking their produce from his fields near Oroington, Kent.

Buying from the farm has become a significant rival to the established retail trade through greengrocers, shops, super-markets and street stalls. the Consumers' Association is to publish a report on "pick your own" farms and whether customers

are getting value for money. public, growers selling direct to scepticism.

On a summer weekend Mr consumers can offer considerable advantages in freshness, and in lower prices because they incur practically no transport or marketing costs.

The accompanying table was prepared by *The Times* last week, on the basis of figures supplied by the Farm Shop and Pick Your Own Association and a random survey of shops and markets in west London.

The prices quoted do not take account of quality, which in supermarkets is usually very good. Apparent bargains, such e getting value for money. as cheap imported strawberries, For an increasingly mobile should be examined with some

Radon gas cancer risk underlined by studies

Two separate studies in the preliminary advice given to the Sovernment about the dangers of naturally occurring radon

The National Radiological Protection Board had suggested that special care should be taken in the use of some nev unsulation materials and of the efficiency of certain ventilation systems in buildings.

Support for the advice is inherent in the conclusions published in the New England Journal of Medicine that radon as 10,000 lung cancer deaths a year among non-smokers in the

Inited Startes, Randon, the gaseous member of the natural radinactive uranium family, is formed directly from the decay of radium. Although ra-don gas has a short life - a half-life of 3.8 days, it decays into two solid alpha particles. If these daughters are lodged in the lung they deliver radiation which can

cause cancer. The latest studies have involved examinations of Swedish iron miners exposed to low doses of ra. don Navajo Indians in America. The Navajo reservation near Shiprock, New Mexico, had one of the important mines when uranium development began for weapons more than 40 years

ago.

The two investigations have rejected a previously held belief that only miners who smoked suffered a markedly higher rate of lung cancers,

In a submission requested by the Royal Commission on the Environment, remedial meaand tougher building methods were proposed last June by the NRPB. The report focused particularly on granite-built houses in Devon Cornwall

Mitterrand puts the case for the Third World

"You would not think the French were at the same conference", an observer remarked during the course of last week's summit. Of all the seven summit countries the French delegation, led by President Mitterrand, the only Socialist leader present, was most consistently at odds with the rest.

At a gathering where so much effort is directed towards unity and smoothing over national differences, the differences often emerge as little more than a matter

And of course the French found their

common ground. They were in good company over the US budget deficit. though they went further than many with blunt warnings about the threat to European recovery from high US interest rates. At times they also found allies among the Italians and the Canadians.

On several important issues, however, President Mitterrand set himself apart from the majority, a fact he perhaps intended to symbolize by driving around during the London summit in a modest Renault while other world leaders were swept along in large black limousines.

The French stand was most evident in

international debt, protectionism and might help to "allay their impatience" number of which have found mention, if reform of the international monetary system. In all three cases their preferences and objections were tied in with France's declared commitment to the

Third World, Of all the summit countries France appeared most sympathetic of the plight of the debt-burdened developing world. While welcoming the progress made towards tackling the debt crisis, President Mitterrand said afterwards that the summit communiqué did not go far enough towards meeting the expectations of the debtor countries. The summit

President Reagan claimed, as he left London yesterday, that the summit had demonstrated the unity of the industrial mations. How far is this claim justified? Has the summit done more to bring the leaders of the Western world together or to display their differences?

of the critical issues before the conference agreement was reached only by settling for a form of words that said less than one or more of the participants would have wished.

The statement on East-West relations was not so positive as Canada wanted in offering encouragement to the Soviet Union to resume a dialogue. On international terrorism, Britain had hoped that the summit would send a clear signal that the leading nations of the Western world were determined to act together to stamp our further abuses.

But the Americans favoured only a general statement, fearing the practical ramifi-cations of being too specific. How was a terrorist to be defined? Might they find themselves expected to act against rebels in Nicaragua? Others at the summit had the French about their relation with Algeria, the Italians with Libya. We shall have to wait a little while to see how effective an understanding on terrorism

ensitive about such exchanges If the most powerful leaders of the Western world were to questions of the day without ever a cross word between them, it would be a sign that they had not really come to grips with the issues.

grips with the issues in London? The summit was unquestionalbly inhibited by domestic political considerations in a number of countries,

reelection, and a serious attempt to make him do so would

Seven nations unite on strategy for the future

The most substantial document by the seven governments taking part in the London summit was the final "economic declaration" or communique. This outlines 10 points of agreement on economic policies, including six subsidiary points on the issue of international debt.

It begins with a preamble on broad economic strategy, including oblique references to the problem of the American federal deficit and high interest rates, and concludes with a number of general expressions of opinion on such disparate issues as the drought in southern Africa and oil-sharing in the event of an escalation of the Gulf war.

We, the Heads of State or being given to these problems by Government of seven major national governments and in such international bodies as the Organi-President of the Commission of the resident of the Commission of the European Communities, have gathered in London from 7 to 9 June 1984 at the invitation of the Rt Hon Margaret Thatcher FRS MP, the Prime Minister of the United Kingdom, for the tenth annual

2 The primary purpose of these meetings is to enable Heads of State or Government to come together to discuss economic problems, prospects and opportunities for our countries and for the world. We have been able to achieve not only closer understanding of each other's positions and views but also a large measure of agreement on the basic objectives of our respective policies. objectives of our respective policies.

3 At our last meeting, in Williamsburg in 1983, we were already able to detect clear signs of recovery from world recession. That established in our countries. It is more soundly based than previous recoveries in that it results from the firm efforts made in the Summit countries and elsewhere over recent vears to reduce inflation.

4 But its continuation requires unremitting efforts. We have to make the most of the opportunities with which we are now presented to reinforce the basis for enduring growth and the creation of new jobs. We need to spread the benefits of recovery widely, both within the industrialized countries and also to he developing countries, especially the poorer countries who stand to eath more than any from a sustainable growth of the world sconomy. High interest rates, and

withing the limits of what our international financial system to national economies can afford. We manage the problems that may still welcome the increasing attention arise. But continuously high or even

further growing levels of inter-national interest rates could both exacerbate the problems of the debter countries and make it more difficult to sustain the strategy. This underlines the importance of policies which will be conducive to lower interest rates and which take account of the impact of our policies noon other countries. - -

9 We have therefore agreed: (1) to continue with and where (1) to continue with and where network strengthen policies to reduce inflation and interest rates, to control monetary growth and where necessary reduce budgetary

(2) to seek to reduce obstacles to the creation of new jobs:

by encouraging the development of industries and services in response to demand and techno-logical change, including innova-tive small and medium-sized

 by encouraging the efficient working of the labour market; by encouraging the improve-ment and extension of job

training:

by encouraging flexibility in the patterns of working time: and by discouraging measures to preserve obsolescent pro-duction and technology:

(3) to support and strengthen work in the appropriate international organizations, notably the OECD, on increasing understanding of the on increasing understanding of the sources and patients of economic change, and on improving economic efficiency and promoting growth, in particular by encouraging innovation and working for a more widespread acceptance of lechnological change, harmonizing standards and facilitating the mobility of labour and cannal:

of labour and capial;
(4) to maintain and wherever possible increase flows of resources, including official development assistance and assistance through the international financial and development institutions, to the developing countries and particu-larly to the poorest countries: to work with the developing countries to encourage more openness. and to encourage practical measures in these countries—to conserve resources and enhance indigenous food and energy production. Some of us also wish to activate the common fund for commodities:

Anti-terrorist declaration International terrorism

I. The Heads of State and Government discussed the problem of international terrorism.

2. They noted that hijacking and kidnapping had declined since the Declarations of Bonn (1978), Vénice (1980) and Ottawa (1981) as a result of improved security measures, but that terrorism had developed techniques, sometimes in association with traffic in drugs.

3. They expresed their resolve to

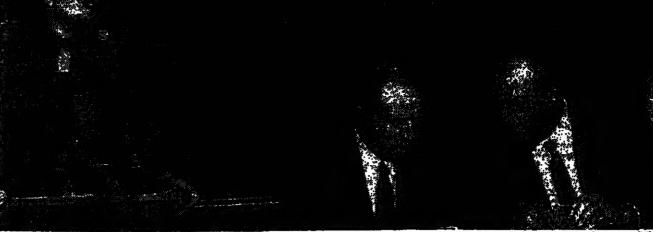

4. They were disturbed to note the ease with which terrorists move across international boundaries, and gain access to weapons, explosives, training and finance.

5. They viewed with serious concern the increasing involvement of states and governments in acts of of states and governments in acts of terrorism, including the abuse of diplomatic immunity. They acknowledged the inviolability of diplomatic missions and other requirements of international law; but they emphasized the obligations—which that law also entails. 6. Proposals which found sup- terrorist acts.

East-West relations and arms control

1. We had a substantial discussion of East-West relations. We stressed that the first need is for solidarity and resolve among us all.

2. At the same time, we are Z. At the same time, we are determined to persue the search for extended political dialogue and long-term co-operation with the Soviet Union and her allies. Contracts exists and are being developed in a number of fields. Each of us will pursue all useful opportunities for dialogue.

3. Our aim is security and the lowest possible level of forces. We wish to see early and positive results in the various arms control negotiations and the speedy resumption of those now suspended. The United States has offered to restart nuclear arms control talks restart nuclear arms control talks anywhere, at any time, without preconditions. We hope that the Soviet Union will act in a constructive and positive way. We are convinced that this would be in the common interest of both East and West. We are in favour of agreements which would build confidence and give concrete expression, through precise commitments; to the grinciple of commitments; to the principle of

Mr Schultz of the US

4. We believe that East and West have important common interests: in preserving peace; in enhancing confidence and security; in reducing connecte and security, in reducing the risks of surprise attack or war by accident in improving management techniques; and in preventing the spread of nuclear weapons.

conflict

Statement by the chair

1. We discussed the Iraq-Iran conflict in all its various aspects.

we have invited initialized responsible for environmental policies to identify areas for continuing cooperation in this field. In addition we have decided to invite the concern at the mounting toll in human suffering, physical damage and bitterness that this conflict has brought, and at the breaches of international humanitarian law that

The Iraq-Iran

3. The hope and desire of us all is that both sides will cease their attacks on each other and on the shipping of other states. The principle of freedom of navigation must be respected. We are concerned that the conflict should not spread further and we shall do what we can to encourage stability

4.1 We encourage the parties to seek, a peaceful and honourable settlement. We shall support any efforts designed to bring this about, particularly those of the United Nations Secretary-General.

5. We also considered the

implications for world oil supplies on the lines set out in the Eco. on the fires set out in the Economic Declaration. We noted that the world oil market has remained relatively stable. We believe that the international system has both the will and the caracity to cope with any foreseeable problems through the continuation of the prudent and realistic expresses that a clean. realistic approach that is already being applied.

There was another conspicuously absent guest at this year's anniversary of the May Revolution, the name given by President Nimeiry to the coup d'état of May 25 1969 which brought him to power, and by extension, to the regime. The extension, to the regime. The absentee was Egypt, rep-resented in former years by top level guests who have included President Sadat and President Mubarak, But Khartum's poli-cies have now alienated even Egypt. Which with the United Egypt, which, with the United States, used to be Sudan's statunchest ally.

The state of emergency which dominates every aspect of life in the capital and many other towns, came after grow-ing discontent in the south, the imposition of Shariz or Islamic law last September and the sudden deterioration of a shaky economy resulting from these

two developments.

Although recently overtaken by northern discontent as a factor in the country's crisis, southern resentment and armed rebellion were the main catelyst and continue to pose an important threat to Khartum. For years, President Nimeiry drew considerable support from

celebrated the fifteenth anniversary of his reign late last increasingly organized opposition in the north and a paralysed increasingly organized opposition in the north and a paralysed economy, President Gaajar Nimeiry of Sudan imposed a state of emergency on April 29. In the first of two articles a correspondent looks at the crisis in Africa's biggest country.

State of emergency: President Nimeiry and the nation he rules. the south for his role as peacemaker: in 1972, he brought an end to the 17-year civil war and gave considerable autonomy to the newly created Southern Region, a great deal more than to any part of the

But political and even economic autonomy was no use without cash. As expected investment and development failed to materialize, the high hopes of southerners started to turn into resentment and, early last year, it became clear that so-called bandits were really

armed rebels common ling a considerable amount of upport. The rebellion has taken the form of the earlier war: nutinies by southern garrisons, armed attacks on police and Army posts, hundreds of young men going "into the forest" to train as soldiers and terrified villagers fleeing both rebels and Army reprisals. For the current war, like the previous

one, is not fought between the African, Christian or animist southerner and the Arab, Muslim northerner: it is a war between southerners and the national Army. However, most southerners continue to see the struggle as one against the north, rather than against the central Government.

The feeling of ethnic, re-

ligious and language division was reinforced last July when President Nimeiry decreed the division of the Southern Region into three new regions. Though many northern observers saw this as an extension of the "divide and rule" principle which had governed the recent regionalization of the north, many southerners saw it as a deliberate attack by the north

on the south, Not only does the southern problem remain completely unresolved, with no sign of

(SPLM) has also already changed the course of modern Sudanese history by disrupting the entire economy. The attack

last February on the main base of the Chevron company at Rub Kona, in which three expatriate employees were killed, forced the US firm to stop all drilling and allied operations until last week when Chevron resumed oil exploration. A few days after the attack on Chevron, six expatriate hostages were seized and one foreign pilot killed in an attack on Compagnie de Constructions Internationales (CCI), the French company responsible for excavating the huge and controversial Jonglei canal. There is still no news of four of the hostages. It was confirmed yesterday that two

West German experts had been kidnapped in the south. An import ban imposed last August cut heavily into customs August cut heavily into customs revenues, the main component of government income. This was compounded in September by the bap on alcoholic drinks, which caused not only a loss to the Treasury, put by some reliable estimates at about \$215m a year, but profound demoralization in a population used to its drink.

demoralization in a population used to its drink.

When the 2,000 doctors working in the Health Ministry resigned en masse in April over hospital conditions and paystructures, it became clear that southern discontent was not the southern discontent was not the only threat to the Government. Though doctors returned to their posts after an unpre-cedented capitulation by the authorities, engineers soon threatened water, electricity, transport and communications services, by holding strike

meetings.

Besieged on all sides, President Nimeiry took the fateful step: he decreed the state of

emergency.
Tomorrow: Repression

Monaco's baby: Princess Caroline of Monaco and her son, born on Friday night, were doing well in the Princess Grace clinic, the principality's press centre said. Her busband, the Italian businessman Signor Stefano Casiraghi, aged 24, was present at the birth of Andrea Albert, who weighed six

pounds 10 ounces. The Princess, aged 27, elder daughter of Prince Rainier, married the French financier M Philippe Junot in 1978, but the marriage was dissolved in October, 1980. She married Signor Casiraghi on December 29 last year.

Gonzalez under fire on Nato

From Harry Debelius Medrid

The General Labour Union UGT, kept up the pressure over the weekend on the Spanish Government to fulfil its 18month-old campaign promise to hold a referendum on Spain's membership of Nato.

The Government of Secor Felipe González has clearly reversed its former anti-Nato position, but it does not seem to be getting its point across without splitting the Socialist party. The split is accentuated

by the prospect of a party congress within six months. The Secretary-General of the UGT, Señor Nicolas Redondo, insisted on Saturday that it was an obligation of members of his union and of the party to take a clear stand against remaining in minutes in the intensive care

Craxi at bedside of stricken Berlinguer

Italian Prime Minister and Socialist Party leader, flew back yesterday from the London summit of industrialized nations to the bedside in Padua of Signor Enrico Berlinguer, the Communist Party Secretary who had been in a come since a brain haemorrhage on Thurs-

day evening.
Signor Craxi, who arrived by car from Vencie airport, was received in complete silence by the crowd of Communist supporters gathered at the said hospital. Only last month were Signor Berlinguer, who is 62 cent. was subjected to whistles and catcalls when he attended, as an

Signor Bettino Craxi, the being treated. He is breathing with the aid of artificial

respiratory equipment.
Afterwards he said: "I have known Enrico for 30 years, a long time in a person's life. Recently we have been quarrel-ling. But the experience of 30. years are many. I do hope that he does not leave us like this and that he continues to live". A medial bulletin described

the Communist leader's condition as unchanged. One of the hospital doctors treating him said the chances of recovery were rated at less than 10 per

• MOSCOW: The Soviet Communist Party central committee had sent a telegram to Italy expressing concern about the health of Signor Berlinguer, Tass said yesterday (AP reports).

Hart to stop attacking Mondale

From Christopher Thomas Washington

Hart made it clear over the weekend that he is determined to carry his candidacy

his candidacy for the Democratic presidential nomination through to the party's national convention in July. But he will now drop his campaign strategy of personal confrontation with Mr Walter Mondale.

Mr Hart told Democrats in his home state of Colorado: "I will do nothing to hurt the Democratic Party and I will do everything to achieve a Demo-cratic victory in 1984. I cannot wait to run against a President who owns more tuxedos than

Senior officials of the Democratic Party are clearly reheved that Mr Hart apparently has ended personal attacks on Mr Mondale, It is generally agreed that if the confrontation con-tinued, the Democrats would election in November.

"Let me put it as plainly as I can," Mr Hart said, "The defeat of Ronald Reagan is the most important imperative of our

"As Democrats and Americans we have a duty that goes beyond the candidate or the party to those who will pay the price of a second Reagan term the voiceless, the powerless, the poor, the elderly, the unem-ployed and those who will be condemned to lesser lives in a lesser America."

The speech was one of the most emotional and most effective by Mr Hart throughout the campaign. In the Mondale camp it was viewed with a

degree of caution, however. Mr Robert Squier, a Democratic campaign consultant, said; "This is the critical period. We have got 30 days to get set up to take on Ronald Reagan. But if this turns out to be a month of mischief we can just as well forget it."

Mr Mandale is on holiday until the middle of this week, when he will have to make contact with Senator Hart and the Rev Jesse Jackson in the hope of persuading them not to challenge his apparent delegate wounds on party unity at the national convention.

Marcos stung by priest's rejection of pardon September 1982 after a military 1982, murder of a town mayor six church workers was final. From Keith Dalton

President Marcos has ordered the Philippines Ministry of Justice to speed up the murder trial of eight churchmen, including an Irish and Australian priest, after their rejection on Friday of a conditional pardon.

Two other charges - illegal possession of explosives and ammunition, and incitement to rebellion - against Father Brian Gore, the Australian, should also be pursued, the President said. They were filed in workers with the March 10,

raid on his church in the central island of Negros.
Soldiers claimed to have

found a grenade, five bullets and subversive literature. Although Father Gore, aged 40, and six lay workers spent three days in jail before being released on bail, preliminary hearings have not begun.

The priest said the evidence was planted by the same soldiers who later charged him, Father Niall O'Brien, aged 44, from Dublin and the same six

and his four aides. They have pleaded not guilty and claim to be victims of a frame-up. Members of the Irish-based

Columban order, to which the two foreign missionaries belong, said the presidential order was ominous and could indicate that the government was no longer prepared to seek an out-

of-court settlement.

Ministry officials said at the weekend that the offer of a

The eight accused, however, said their rejection did not mean they had closed the doors to future negotiations In a statemenmt at the

weekend, the churchmen said; "While the offer of pardon was not acceptable because of its legal connotation, it is not true that we are uncooperative with the Government in helping to dismiss the case. We merely stated the basic minimum pardon for the priests on which we required ... that the condition that they leave the innocence of the accused not be Philippines, and parole for the compromised."

Unions angry at Botha's meeting with Pope

From John Earle Rome

The Pope will receive privately today Mr P W Botha, the South African Prime Minister, who arrived yesterday on a four day visit to Rome at the end of his western European tour.

The Pope is expected to reaffirm the Roman Catholic church's opposition to racial discrimination and its support for Namibia's independence in accordance with United Nations decisions. Last January he reaffirmed the church's position when he recalled in a speech that several peoples were awaiting their independence

and recognition of their status by the United Nations. We support their hopes," he said. "Among them we cannot but recall Namibia whose slow and laborious journey has not been fulfilled."

Mr Botha is accompanied by Mr Pik Botha, the Foreign Minister, and Dr Dawie de Villiers, the Minister of Industries. Commerce and Tourism. The South African Prime Minister is due to see his Italian counter-part, Signor Bettino Craxi, tomorrow before flying home late on Wednesday.

European notebook

Three issues that cross frontiers

lf opinion polls are to be believed, there are three trans-frontier issues exercising the minds of voters on the relatively rare occasions that they think about this weeks elections to the European parliament.

Those issues are unemployment (about which the EEC has agonized inconclusively for years): wasteful farm surpluses (about which the EEC has only just begun to agonize): and defence (about which the EEC has only just begun to agonize); and defence (about which the EEC has no real right to agonize

The run-in to the election has coincidentally given a chance for studying some of the Community's performance in all three areas.

stage in Luxembourg (a country with almost no unemployment problem of its own - yet), where Germany to pay extra com-the Social Affairs and Finance pensation to its farmers, a

Ministers were meeting. While not all would go as far as the French in claiming that it was a problem cating up 18 per cent of the Community's wealth, there was much tut-tutting and agreement that something could be done. Not wintly were sould be done. Not much was.

Britain blocked two of the measures suggested. One would have put up about £60m to help small companies. The other would have given the green light for a shorter working week.

The Netherland blocked another project aimed at smoothing out trans-frontier tax

arrangements for companies and so helping them to grow. It also blocked progress on the British dream of a common insurance market.
On the agricultural front, the week saw the surplus butter

Last week, for example, mountain grow expensively to unemployment took centre over a million tonnes. It also saw the Commission wrestling with a request by West

request which threatens to infuriate other countries if granted and to infuriate West Germany if denied.

As far as defence is con-

cerned, tomorrow sees the curtain go up on the next act of France's attempt to bring the Western European Union (WEU) in out of the cold, with a meeting in Paris for foreign ministers of the seven member

countries. Defence is meant to have no place in the economic Community, but, as President Mitterrand said last week in his speech to the European Parliament, the question of joint security cannot be avoided by the EEC countries.

France sees the WEU as an ideal framework for wider coopération since it excludes neutral Ireland and the unenthusiastic Danes and Greeks of the ten EEC countries, it also has the advantage of including the French, who are not part of Nato's Eurogroup,

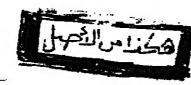

which is the body meant to be coordinating the eastern pillar of the alliance. The EEC voter might well

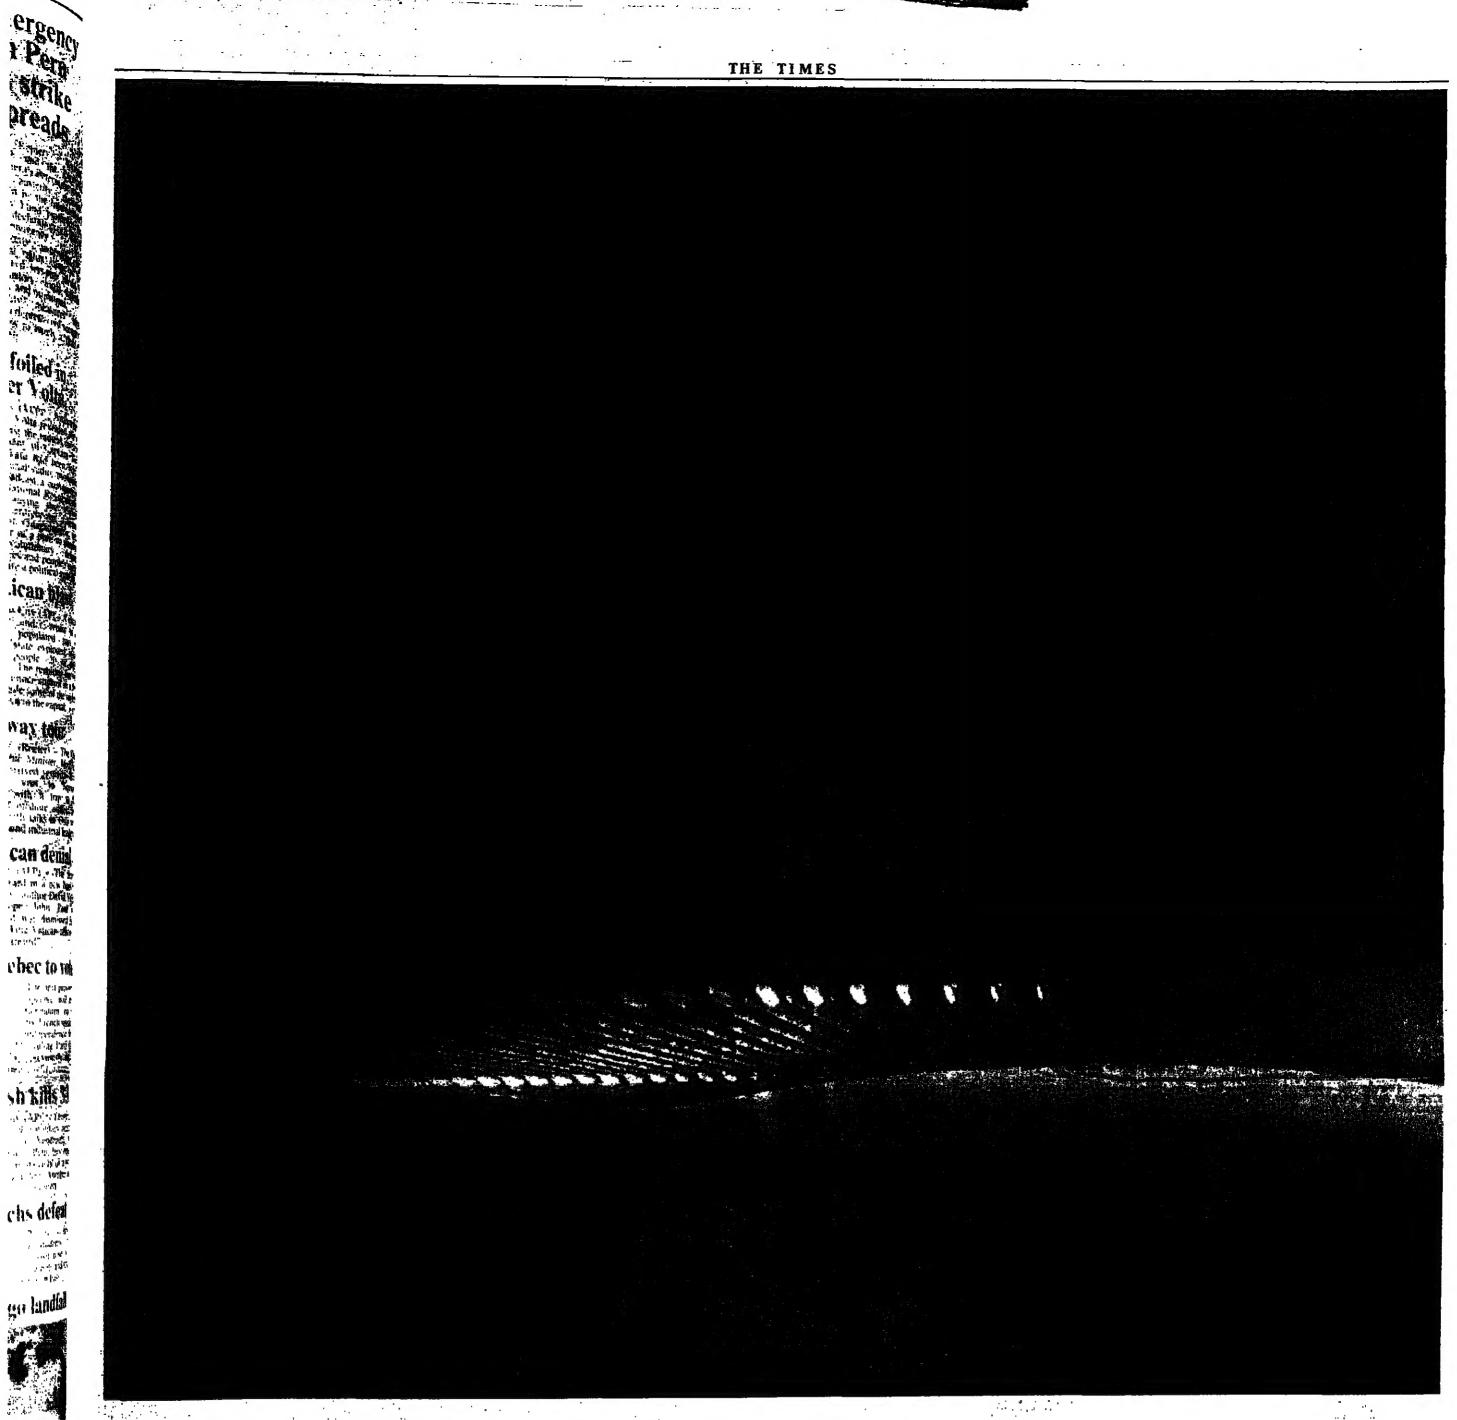

wonder what relevance the European Parliament has to any of this. There is some. MEPs could point to reports they had passed urging the need for most of the measures But the fact remains that they were responsible for none, of the decisions - nor are they ever likely to be until such time as the turnout in thes

A good case in point is the latest Stratus system for voice switching. It will make air traffic control along southern Britain's busy flight paths even safer and easier.

IAL, a part of the STC Group, had to perfect new distributed microcomputer technology for speech networks in the development of Stratus.

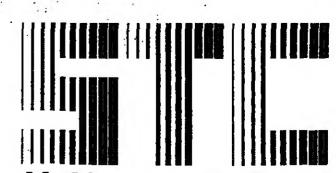

But despite this complexity, air controllers appreciate how comparatively simple it is to operate.

And what's true for air traffic controllers holds true for everybody as electronics increasingly makes itself felt at work and in the home.

No matter what technical heights we rise to, when it comes to ease of operation we keep our feet firmly on the ground.

If you'd like to take a closer look at how STC is shaping the future, we'll be delighted to send you our colour brochure. Write to:

Making sure the future has a future

Dancing on a time-machine.

With the West End rapidly becoming a museum of great dance musicals, when better to welcome back On Your Tous from 1936 and, more recently, a two-year Broadway success?

This was the show that Richard Rodgers and Lorenz Hart wrote, realized they were in trouble with, and took to George Abbott. Mr Abbott agreed to rewrite the book, did so, and then regretted he would be unable to stage it on account of it now being the winter of 1935 and his habit in winter was to play golf in Palm Springs. Accordingly Rodgers and Hart hired themselves another director, got to Boston and found they were still in deep trouble, not now just with the

Abbott was again sent for, shown the production and asked by Rodgers and Hart for some sort of comment. "Boys", he said, "we have nothing to talk about. There'll be plenty of time for talking after we start rehearsing tomorrow morning. Now let's get some girls and go dancing."

What Abbott did next morning was simple and radical; he went back to the plot as first devised by himself and Rodgers and Hart, staged it and took them on to Broadway. There, much helped by a couple of Falanchine ballets - one of which, Slaughter on Tenth Avenue, was late to turn up in several Hollywood movies and was brilliantly parodied in The Bandwagon by the Fred Astaire for whom it was intended -and the show's one hit song, "There's a Small Hotel" (an unusually rustic number about country inns and c'turch steeples to have come from the big-city typewriter of Lorenz Hart), Car Your Toes turned into the hit of the season and launched Rodgers and Hart on eight years of remarkable productivity and success.

Now in his middle nineties, Mr Abbott is the only survivor of that

original and remarkable Rodgers-Hart-Balanchine team, and in over-seeing the new London production, which opens tomorrow at the Palace, he is also handing it on to another

Donald Saddler, the present chor-cographer of all but the Balanchine ballets in On Your Toes, was just 15 when the show first opened on Broadway, and he first got to work with George Abbott on the choreography of Wonderful Town 20 years later:

"I remember Rosalind Russell coming over to me during rehearsals in 1953 and saying wasn't George amazing for a man of 67; now he's about to be 97 he still seems to me. pretty amazing. He was the first man to put real comedy into musical comedy: he's a technician, which is why he's been able on this show to teach so many ballerinas like Makarova and the ones who replaced her on Broadway, Valentina Koslova and Galina Panova, how to act when they never had before. He's also a man who can work with other experts like Balanchine: he understands about collaboration. I hate those modern Broadway shows where all you get to see is the personal view of one director: a show has to be more than

Like many choreographers of his generation, Saddler started out as an original member of the American Ballei Theatre, and indeed was dancing with them over here as early as 1946. Born in California, the son of a rancher in the San Fernando Valley, he was told to do gymnastics while recovering from a childhood illness and found that the nearest gym also offered ballet and tap classes at bargain rates. After college in California he moved to New York and joined the American Ballet Theatre in the generation of Jerome

"People make the missiate when doing musical revivals of trains to

doing musical revivals of trying to comment on the period. I have to tell my dancers not to camp it around. In 1936 people danced because they thought it was wonderful to dance, and we have to make the audience coming into the theatre feel that they've come into 1936. An Abbott show is always fast, energetic, clean and crisp; the laughs don't change from night to night, and nor do the

"It's a precision job. Makarova had no comic or dramatic experience at all when she started with us. Abbott taught her all of that, and I taught her how to be heard. She had this tiny

volce so I said just be Russian and talk to the audience the way you talk to your son, and all at once the volume went right up.

"As soon as the London cast is settled in" (Doreen Wells replaces Makarova at matinées and, from the ninth week of the run, at night as well) we go back to America to do the television and the tour. Over there now people are very interested in the history of great musicals, but there's no real tradition of 1930s show

dancing, so if you're not careful you go into rehearsal with a lot of rockers. One sequence in this show really a contest between Balanchine ballet dancing and Ruby Keeler tap dancing, and you have to know a lot about the period to get that right. When I start work I put up a lot of

1930s photographs around the walls of the rehearsal room - fashions, social life, people at parties - so the kids can see how people stood and the way they smiled and what they wore."

were spent with the Ganelin Trio, a Russian jazz group.

BBC2 had a crackle at John

Photograph of Donald Saddler by Nobby Cla

McCormack, the centenary of whose birth falls this week: a crackle because we started on cylinders and went through some rather aged recordings. The voice was distinctive; the success phenomenal. Earning £200,000 a year in the Thirties, living in an Irish manor with 14 servants and nipping over to America, his adopted country, in the winter to wow then some more must have soothed any hurt caused by unfind people who said he was wasting good voice singing a lot of rubbish.

It was a sketchy documentary, short on film and not over-endowed with facts but nostalgia - and sure there will be more of it on BBC2 on Wednesday - won through.

PUBLISHING

Representative force

tatives' Association (founded 1924) has about 500 members, 10 per cent of them women.

Although it exists exclusively for social and charitable reasons, its members constitute the vast majority of those who, on behalf of fadividual publishers or groups of publishers, per-suade or fail to persuade bookselles to display and stock for theorning titles. With more than \$0,000 new books published sinurally, it is hard to see how a highleseller can sensibly decide what to buy, and what to resist. If even one copy of each of last year's new publications were stocked - let alone a selection of books published in previous years - the shop would need to be sizeable.

The Book Publishers' Represen-

A publisher's representative (they do not like to be called travellers) has his own territory, which may be London, the Home Counties, the Midlands, the North, Ireland or wherever. The size of the territory depends upon the size of the publisher's list. The largest houses employ two dozen reps or more, each covering relatively small areas of the country; smaller houses make do with four or five salesmen. Some bookshops will be visited two or three times a year, others - in major cities every few weeks. In London, the reps of the bigger houses will call upon their main accounts

The current president of the work on commission for a rect". number of small publishers. They can earn more than their salaried colleagues or competitors but theirs is a less secure occupation.

A rep costs a publisher £25,000-£30,000 per annum to run, which includes, says Mr Robertson, "the running of a car, other tools of the trade and 'away from home' expenses. Fortunately, young people are coming into the trade and are paid a salary on which a

played, and if he were not to take back the unsold ones he would receive short shrift thereafter from the bookseller. It is generally denied that this happens. To an alarming degree, the

quantity a bookshop takes of a new title depends on the relationship and trust between bookseller and representative. Why, you may think should any rep know how potentially saleable a forthcoming book may be? We are not dealing with beans, or Mars bars. Why should a bookseller believe a rep knows? Subject to a specific publisher's list, a rep may or may not have read some of the books he is employed to sell. His knowledge will mainly have come from being briefed by the book's editor at the publisher's spring or autumn sales confer-ence, and his sales manager will have provided "angles" on how to sell - or subscribe, as the technical term is - the title into shops. Some aggressive sales managers may also set sales targets below which reps are not supposed to fall.

As Mr Robertson remarks, Modern methods of compute rized stock control, microfiche and tele-ordering are geared principally to stock titles". (That is, not new books.) "It is only through reps that personal contact between publishers and booksellers is maintained. From the rep's knowledge of the bookshop concerned, his de-BPRA, Alasdair Robertson, has bookshop concerned, his de-been a publisher's rep for 14 years, 10 years with Purnell, four with the Hamlyn Group, tial sale of a new title is arrived and is at present with their at and in agreement with the Newnes subsidiary. Ten per bookseller, the correct number cent of his members are of copies to be bought is freelances. That is, they tend to agreed." Note the word "cor-

The whole business is something of a charade. Most trade books (general fiction and nonfiction) sell few enough copies and authors rarely find their newly-published masterpieces in bookshops. (One famous emporium is notorious for leaving packets of new titles unopened under the counterand returning them a few weeks later to their publishers, claiming there was no demand.)
The representative, subject to

reasonable standard of living list and territory, may subscribe can be maintained... new books days, we have a months or more ahead of more representive is more econpublication: this is the reason publication: this is the reason publication. usually offered for the inordinate length of time it takes most publishers to transform type-script into bound book. The fact bookseller is likely to be script into bound book. I we script into bound book. I we exclusive reps are more likely to that most books never appear in most bookshops is an irony that does not seem to be appreciated by publishers or booksellers.

Van Morrison

Dominion

Twenty years ago, when Van Morrison was fronting the R&B band Them in the exotic Maritime Hotel, Belfast, he was cast in the role of moody punk. Essentially a private man, Morrison has always sought to debunk myths about himself. He calls his music doing a job, and it is certainly one that he does very well.

Now playing an extended season in London, Morrison began his performance revisiting the past, with a relaxed medley of Them favourites. He eased into a lengthy set with the same casual control, a finely tuned six-piece band allowing him the space to improvise when the mood took him. Listening to Van Morrison is like absorbing a sizeable chunk

of contemporary pop history, and as the evening unfolded he played selections from most of his records and evoked dozens of different styles. A fine soul singer, he was at his best with a subtle reading of "All in the Game" and the heart-warming ballad tribute "Jackie Wilson Soul and emotion, usually such cheap comodities, were expressed in just about everything he touched.

Surprisingly, Morrison played less of his current Celtic swing than expected. When he did, particularly on the evoca-tive "Vanlose Stairway", the atmosphere had some of the electricity of a revival meeting. The audience were alternately transfixed then euphoric when he duetted in call and response fashion with the saxophonist Richard Buckley as the climax to "The Common One"

Rock

The elements of reflective mysticism and quiet vision that inform Morrison's work have always been present, a fact that allows him to reinterpret great old numbers like "Madame George" and "Ballerina" with their elegant acoustic structures. and then switch to the updated finger-popping swing of "Clean-ing Windows", with its swivelhipped brass and funk backbeat. While he based this set on a series of well-known songs, triggering many happy memories, there was nothing nostalgic about the music. Morrison fits a tradition

whose trademark is quality rather than fashion. He sang of Sinatra and Nelson Riddle; his band progressed from rock to hard jazz to gospel. It was excellent value. By the end, with a show-stopping "Full Force Gale", the crowd were on their

Atmosphere lost in character-building

Owen Wingrave Snape Maltings

The Aldeburgh Festival has chosen this year one of the most problematic of Britten's works for its opening production, Owen Wingrave. This was the opera British wrote in 1970 for BBC Television, and it has often been assumed that the awkwardness of the piece could be blamed on its being con-ceived for film rather than for the opera house.

However, the Suffolk production, using the set by John and Edward Piper designed for the Covent Garden staging, makes it abundantly clear that the opera has its real home in the theatre, and that the moments when it remembers it is a television piece, the orchestral variations that focus on different family portraits, or the interior monologues at the dinner table, are the weakest

places in the work. Curiously enough the other two operas which Britten wrote in collaboration with Myfanwy Piper, The Turn of the Screw and Death in Venice, are both more persuasively film-like in their splicing of short scenes into a continuous musical flux.

They are both also confined in personnel and location, and it must be the comparative looseness of Owen Wingrave that makes it so much the lesser opera. Needing to sketch in so many characters, Britten and his librettist are obliged to give them excessively explanatory episodes early on, and there is not the opportunity to create the single brooding astmosphere Irving Wardle of Bly or Venice. It must also be said that Owen's quandary is a

lot less interesting and a lot less musically and dramatically fertile than the Governess's or Aschenbach's. He finds himself a pacifist in a military family:

This baldness in the central situation appears to stultify much of the surrounding dialogue, which tends to be pat and artificial. It can also be disconcertingly banal: the Maltings audience were good to give it only one unlooked-for laugh. On the other hand, pacifism was obviously something Britten cared about, and Owen Wingrave gave him the chance to consider it musically at greater length than anywhere else except in the War Requiem.

His means in the two works are rather similar. For centuries music has been an instrument of war: the musical pacifist has no images to compare for power with trumpet calls, fanfares and tattoos. Britten, therefore, takes those things and turns them against themselves. The score of Owen Wingrave is filled with martial music, but martial music given a harmonic or rhythmic smear that makes it foul. The result is a combination of the magnificent and the malignant that Steuart Bedford realized with splendid force in conducting an orchestra of students from the Britten-Pears School.

The cast from the same institution was also excellent.

James Meek as Owen took the wise course of not making him too readily a hero; he was strength until the flowering of his apostrophe to peace, which was beautifully sung. Helen Charnock and Gary Coward made the Coyles by far the most human characters in the opera, both of them shaping their lines as natural and even inevitable

Among the awful family, Marcia Swanston as Miss Wingrave was incisive and very much the head of the house, but not so over-characterized as to be ugly, and Jennifer Bolam was an attractive fiance. There is another performance on June 16 with different singers.

Paul Griffiths

Tosca

Covent Garden

It was as Tosca, with Placido Domingo and in Newcastle, that Mara Zampieri made her British debut; and now, not before time, she has arrived at Covent Garden, and in the Ms Zampieri is not, in any

conventional sense, the opera singer's opera singer. But only those concerned with the patina of the role could let this bother them. For she uses the raw core of her voice, which speaks so directly and penetratingly, to draw out a rawness of emotion which sharpens the edges of the tortured and self-torturing heroine she can portray so well With Giacomo Aragali re-

thing to do, too, with the Scarpia, Guillermo Sarabia, making his Covent Garden His is a gros et gras portrayal: the voice and face of the all-purpose villain are moulded in Plasticine rather than in clay, and he is too selfconscious in vocal and physical gesture to make his particular evil very

much more than gesture alone Zefirelli's production, now restaged by Richard Gregson, still holds its own as a unit; and, if its essential spirit is weakening it continues to provide handsome cameos for the by no means significant Angelotti of Rederick Earle and the Sacristan of John Gibbs

Hilary Finch

Concert

Mieczyslaw Horszowski

These were the main presenc-

es, too, in his recital pro-gramme, and distinctly close presences if one remembers that Mr Horszowski's lifetime covers a large stretch of intervening history. Admittedly, Bach was represented only as the overrevered influence on a prelude by Casals, but it would be nice to think that Mr Horszowski's playing of Chopin, in particular, perpetuated some tradition; a tradition of almost oriental rubato, not so much expressive as decorative in its effect, and of the by Martinu. The Fifth Day of deliciously firm singing tone. The slow movement of Chopin's B minor Sonata showed. these rare qualities to perfection, and it was good to be listening in the Maltings, where the whole hall could resonate

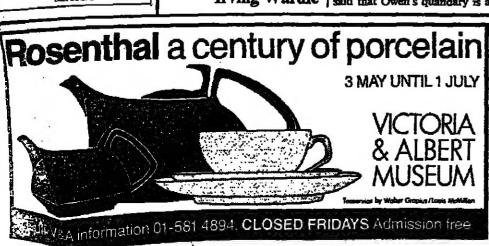

warmly and truthfully in re-

sponse to Mr Horszowski's

was so wonderful it would be absurd and unfair to expect a pianist of such age not to be a little limited by physical frailty. The miracle is that so much of his art, and all his memory, is unscathed, and that he remains a match for the intricacies of rhythm and timbre in Debussy's Children's Corner or in a little piece of delicate chinoisethe Fifth Moon. What also shone from these performances. as from the Chopin, was a total absence of rhetoric, an ability after 90 years to be fresh, simple

Paul Griffiths

Snape Maltings

The Polish pianist Micczyslaw Horszowski was the great discovery of the last Aldeburgh Festival: not an infant but a veteran prodigy. Old enough to have been patted on the head by Brahms, as we reported at the time, he was virtually unknown in this country before Murray Perahia invited him over for that occasion. On Saturday evening he returned for another recital, due to be followed this morning by a master class on works by Bach, Beethoven and

Not everything in the recital

and unassuming.

THIS WEEK, THE LORDS WILL LOOK AT BOTH SIDES OF THE ABOLITION ARGUMENT.

The Government's controversial Paving Bill is about to enter the House of Lords.

J. Craddoci

Designed to cancel next year's scheduled elections for the six metropolitan county councils, it paves the way for the abolition of these authorities.

Unheard of in peace-time, the scrapping of elections sets a very dangerous and disturbing precedent.

Constitutionally suspect, it has nevertheless been forced through the Commons by a Government which refuses to listen to reason.

Effectively denying 18 million people the fundamental right to vote, this, and the wider issue of abolition, has caused widespread concern throughout the country.

Although the Government won't admit it, literally thousands of highly critical responses have been made to the proposed legislation.

Most of them from totally unpartisan quarters. And some from elder statesmen of the Conservative party.

But it seems the Government's mind is made up. "What has been revealed is how little prior thought

went into this programme in advance not only of the election and the manifesto but the publication of last autumn's White Paper. Debaters in the Lords must not let ministers escape with interim arrangements which manifestly abrogate their own principles."

TIMES LEADER, 24TH MAY 1984

"It could in no sense be construed as a defeat for the Government if it were now to decide that it needed more time to consider how best to reorganise urban local government. The complexities demand a great deal more work to ensure that what follows is not less democratic and less accountable."

FINANCIAL TIMES LEADER, 8TH MARCH 1984

"The bill will go through, that is unless the Lords show more gumption than they did with the rate-capping legislation. In this case they should do so, for whereas the rate-capping bill has dubious constitutional implications this one is downright improper and would be thrown out by a Supreme Court had we had one." PETER JENKINS, THE GUARDIAN, 16TH MAY 1984

"The Government's stand over rate-capping and the abolition of the big metropolitan councils has cost Mrs Thatcher's party a large number of votes. The message to Mrs Thatcher is: Stop! Look! And listen! There is a lot of discontent in this country, more than you seem to have realised"

DAILY STAR LEADER, 4TH MAY 1984

Somewhat prematurely, it considers itself to be home and dry, with the Lords only needed to rubber stamp the decision it has already made.

DEFENDING THE INDEFENSIBLE.

No wonder the Government is against talking things through.

The little it has said on the subject has done nothing but damage its own case.

For example, Environment Secretary Patrick Jenkin claimed his plans would streamline local government and improve efficiency. Yet there's overwhelming evidence that abolition would be a costly and senseless move. Creating a vastly more complex and less accountable tier of local government

He speculated that savings of up to £120m a year could be made. But a team of top financial analysts showed that abolition could actually cost hard pressed ratepayers another £61m a year, and require an extra 1400 town hall staff.

In truth, the Government's plans are inadequate and illconceived, barely concealing its true motive. Abolition for reasons of political expediency.

However, what's particularly ironic about the whole affair is that we, the metropolitan county councils, have never claimed the present system of local government to be perfect or above change. We are more than willing to participate in any full and independent review of local government structure and finance; a review which the Government is curiously determined to avoid at any cost.

As the Bill is debated in the Upper House, we hope their Lordships will see this ignoble plan in its true colours.

And, as guardians of the Constitution, (the Commons having abdicated the responsibility), do the only proper thing.

Especially given Mr Jenkin's frank admission to leaders of the threatened councils only last week. When, challenged to point out a single error or misleading statement in the very substantial case we have presented publicly, he could not do so.

"It is incredible that a Conservative Government should be acting in this thoroughly un-Tory manner: unbelievable that its backbenchers are more concerned in putting party before country that they will not heed the voice of reason from so many of their own eminent statesmen."

LOCAL GOVERNMENT REVIEW LEADER, 19TH MAY 1984

"It is a bad Bill, and it is paving the way for a worse Bill. It immediately lays the Conservative party open to the charge of the greatest gerrymandering in the last 150 years of British history.

That is what we, as a party, are being exposed to."

MR E HEATH, 11TH APRIL 1984

SPECTRUM

As the men's tennis stars warm up at Queen's Club today in readiness for Wimbledon, the last British men's

Wimbledon champion, Fred Perry (left), recalls his success 50 years ago and assesses how he would have fared against today's young tennis turks

Game, set match and snub

It shows how we have all meliowed over those 50 years from the days when some elements in the All England Club and the LTA looked down on me as a hot-headed, outspoken, tearaway rebel, not quite the class of chap they really wanted to see winning Wimbledon, even if he was English. I've mellowed, too, I think I'm very much a leopard who has changed his spots. Looking back 50 years later. I have to concede that I was sometimes a little brash and aggressive about what I regarded as the class-ridden set-up there. But at the time, a young man with my background was bound to feel that snobbery very keenly, and I still get angry about the shabby way I was treated when I won Wimbledon in 1934 - the first Englishman to do it for 25 years.

in those days there was no formal presentation of the championship trophy on court. You simply shook hands with your opponent, picked up, your gear and walked back to the dressing room. I had beaten the

went for a long soak in the bath to case my muscles and let the significance of it all sink in with the bathwater. I was the proudest bloke in a bathtub anywhere in England.

Suddenly, out in the dressing room, I overheard the distinctive voice of Brame Hillyard, club committee man, talking to Crawford. "Congratulations," said Hillward. "This was one day when the best man didn't win." I couldn't believe my ears. What about his in previous times I'd beaten him, in the finals of the US and Australian

championships?
Hillyard had brought a bottle of champagne into the dressing room. and given it to Jack, whom I so clearly remember having beaten in straight sets not half an hour before. I leapt from the tub, rushed out and, sure enough, found Crawford holding the bottle. True, I hadn't been quite forgotten: there, draped over the back of my seat, was the official acknowledgement of my champion-

Referee F R Burrow with the Australian Jack Crawford and Perry (right) after his 1934 victory at Wimbledon

ship...an honorary All England Club

member's tie.

Nobody said. "Here's your tie.
Fred. Welcome to the club."
Nobody even said, "Congratulations." The tie was just dropped. there for me to find when I came out of the bath. Instead of Fred J. Perry the champ, I felt like Fred J. Muggs the chimp. The Perry balloon was certainly deflated.

I don't think I've ever been so ngry in my life. That stuck-up attitude hurt, it really did. All my paranoia about the old-school-tie rigade surfaced with a vengeance.

Still, apart from the time in. 1936 when my membership was auto-matically rescinded when I turned professional. I never had another dispute with the Wimbledon authorities. And even then. I was quite prepared to abide by their decision because that was the rule in those days, when the word "professional" sent a shiver through their portals. All those hatchets have been

Wimbledon has been a leader in bringing about change and improvement in the sport.

I never thought I'd live to see the day when a statue was put up to the son of a Labour MP - my father, S. F. Perry, MP for Kettering - inside the manicured grounds of Wimbledon, There will be a few former manicure of the All Frederic Club. members of the All England Club and the Lawn Tennis Association revolving in their graves at the thought of such a tribute paid to the man they regarded as a rebel from the wrong side of the tennis tramlines.

I am, of course, bowled over by the All England Club's decision to commemorate the liftieth anniver-sary of my first Wimbledon win in 1934 by renaming the Somerset Road entrance to the ground the Fred Perry Gates, and honouring me still further by erecting the statue, commissioned from the sculptor David Wynne. I can only compare it to the Football Association putting one up for Stanley Manhews at

Wembley stadium, and I'm thrilled

To me, Wimbledon is the greatest place in the world and Centre Court is the finest arena. There's a certain air of sevenity about the place; quite matronly, in a way. It just sits there quietly, not making a fuss.

I have had a love affair with Wimbledon since the time I first

stood on Centre Court in 1928 as a paying spectator. Whenever I walk through those gates with the insignia AELTC (All England Lawn Tennis Club) I still get the sort of thrill I don't experience anywhere else in the tennis world.

When the All England Club moved to their present site from their old Worple Road ground in 1922 everybody told them the place would be a white elephant; they would never fill it. But Wimbledon is not just concrete and seats like Flushing Meadow, the home of the US Open and to my mind the worst by far of the Grand Slam tourna-ment venues. Wimbledon is steeped

in a special atmosphere. Wherever I appear, on radio or TV or giving lectures, I am always asked, particularly in America, "Why is Wimbledon the best?"

This is what I tell them: tennis fans and players alike say they are going to the US Open or the French Open, the Australian Open or the US Indoor, the Chinese Open or whatever, but in Britain they simply

say they're going to Wimbledon.
When you think of Wimbledon you don't think of it as a place on the map where the tournament happens to be played. You think of the tournament first and then you realize that Wimbledon happens to be a suburb of London! Wimbledon must be the only London suburb known all over the world. Even the Americans, who possess most of the things that are biggest and best, are in awe of Wimbledon, which is why they call it "The Big W".

In America there are always announcements in the sporting magazines from tennis players who

advertise themselves? Not as "For-mer US Open players" or "Former French Open competitors"; no "Former Wimbledon player". That is an acknowledgement of its special place in tennis. There is an aura about Wimbledon, a touch of class. about Wimbledon, a total of class. The Virginia creeper on the walls keeps the place looking so traditional, yet the way Wimbledon has expanded over the years, while still retaining that historic showpiece of a Centre Court, has given the greatest championship the best of both

worlds.
Nothing in the world can prepare
you for Centre Court. It is
completely surrounded by a covered stand and once the ball goes up in the air you see it like a football because of the dark background. You think you've got all the time in the world to hit it, but this is one of the greatest pitfalls for anybody playing his first match there. The debutantes are usually all over the place for a set and a half because their timing is wrong. You see all tennis courts are 78 feet long so when the server stands on the baseline and you're waiting to receive serve, on the other baseline or just behind it, you have 78 feet in which to see the ball and prepare to

Now, on most of the courts on which we played there would be about 21 feet behind the court and about 17-18 feet on either side, at which points the stands would begin. At Wimbledon on the centre court, however, there is a runback of something like 30 feet to the wooden barrier where the linesmen sits; and about 20-25 feet, before you reach the covered stand. Even then, the sea of faces is not in direct sunlight, but subdued light. So when the ball is tossed up by the server above the level of the backstop, you can see it clearly enough, but it seems to be about a hundred miles away. In about a numered times away. In reality, of course, it is still only 78 feet away, but you think you have more time than you actually do. This is why so many inexperienced players on centre court suffer from

so called "Centre Courtitis".

Their problems are compounded by the fact that inexperienced players are often pitted on Centre Court against name players, and have a different approach to the ball. In general, a lesser player runs to a ball and then swings and hits it. The class player doesn't do that he brings his racket back as he moves. The trick is not to run to a ball and hit it, but to run to a place from which you can conveniently reach out for an anticipated return. There's a hell of a difference.

To me the Centre Court is the preatest place in the world and from the word "play" in a fourth-round match in 1930 it suited me right down to the ground.

One of the questions I am regularly asked is. "Do you think you could have beaten Borg? Or McEnroe? Or Connors, or Lendi? People find this sort of speculation fascinating in all sports and I can understand their wanting to know, but I like to turn the

question around by asking them, "Could Jack Dempsey have besten Muhammad Ali?" The answer, of course, is that we will never know - though this doesn't stop the specuviation! In my own case I had to nack

up playing seriously in 1942 when I broke my arm in that match at Madison Square Carden New York, and in one way I found it a good thing because of the well-known cruelly of the sporting public towards their former heroes. They see someone who's a bit past it trying to stay at the top level and they come out with such cutting comments as, "You're a bit slow," or "Put on a bit of weight, haven't you?"

With me that never happened. Because I went out at the top, I was never a has-been. People think I was perhaps a little better than I really was, a bit faster than I really was, that my forehand was more devastating than it really was, and that I was a much nicer person than I really was - even if they didn't like me at the time! And I think it's much better to keep it

One thing about me was not evaggerated: I gave no quarter. I was a great believer in getting my nose in front and making sure the other fellow's nose didn't catch up.
I don't think I was the

world's most gifted player by a

long stretch. For one thing, didn't possess the variety of shot required for that. But I never went on court to come second, and if I did lose to somebody I was determined that he would never put it

I hear a lot about Englishmen There's nothing good about losing, and if somebody makes a habit of it, there's a simple level. How you get round it is entirely up to the individual. I I ever said, "Good shot"

. Nor did I ever believe in the not to do these things.

the "Could-you-have-beaten-so-and-so" debate is the question of which rules you would play under. In my time we had to stand with both feet behind the baseline to serve and keep one foot on the ground until after

across me again.

being good losers. Hogwash! explanation: he's no good. It should be the end of the world if you lose a tennis match at top was a loner, though I travelled most of the time as part of a team and had a lot of friends. and I always made it my business to know more about my opponents than they knew about me. I was pretty crafty. If which I very seldom did - they were never sure if I meant it or

gesture of throwing a point away in order to acquire the reputation of being "a good sport". I didn't aspire to being a good sport: "champion" was good enough for me. Say, for instance, you are match point down and you hit the ball out. but the linesman calls your shot good and saves you. Are you then going to throw away the next point and go match point down again? You quickly learn

Another factor to consider in

Could I have beaten Bjorn Borg?

skid forward like Lew Hoad used to do; go into a rocking motion like John Newcombe and let fly when you have worked up to about 20 mph; jump in the air - that's a popular one; or do an Arthur Ashe - stand well behind the baseline, throw up the ball ahead of you, and then leap after it. All this is now permitted. Players can get a foot and a half closer to the net than we could, legally. This is why, on grass and other fast surfaces, now a different ball game. The server bangs the ball into play and grunts; the other man hits it back and grunts.- End of

But whatever the rules and whatever the era, a champion

making contact. Now you can earns his fame because he possesses that extra something the other fellow doesn't. And I believe champions always have that quality, in any sport. You can't put a name to it, but I can tell you this; anybody who played me would have known about being in one hell of a tennis match.

People are especially fond of. making comparisons between myself and Borg because it was he who exceeded my total of consecutive Wimbledon wins, although with all due respect, Borg didn't beat my recordsince it wasn't strictly the same as mine. Technically, I was the first player to win three 1935 and 1936) having played through the whole champion-

Renshaw won the Wimbledon title six times in succession between 1881 and 1886, in those days the holder didn't have to defend his title until the following year's final. A tournathe winner played the title holder. This exemption was in force until 1922, so Renshaw is the record holder up to that time. After 1922 I am the record holder until 1968, when Wimbledon went Open. My three titles were amateur ones, and my run came to an end when I turned pro - not because I was beaten, but because I was banned. So Borg didn't beat my record. Borg won Wimbledon

ships, for although William been playing in my era as an amateur, though, how many of when he reached the 1983 those years would be have Wimbledon semi-final against before turning professional?

weren't allowed to play any against someone like McEnroe, amateur events after turning who has such awesome racket pro, who is to say that Don control and who can make you Budge wouldn't have won three pay the full price for not being in a row if he hadn't joined the in position. prefessionals? I for one am. When Borg won his Wimble-dons there was no need for him to turn pro: he already was one. five times altogether, he was I was happy for him and was and Victor Amaya du always eligible to play. If he had among the first to shake his great Wimbledon years.

successive title. After all these records and so-called sporting milestones exist to be broken.
I was also thrilled to see my

hand when he won his fourth

judgment vindicated where Borg's talent was concerned. When he won the French Open at the age of 17, I was doing a BBC broadcast and was asked, Will this fellow ever be good My answer was a very positive yes, since Borg had learned all his tennis in Sweden, where the bounce of the ball is low outdoors and even lower and faster on their indoor courts, on which the Swedes spend most of

Borg learned very early how to run on grass - which is something Ivan Lendi has never learned to do. It's not just a matter of breaking into a run; you have to glide into your shot and then start moving back into position right away. You can't hit the ball, watch it, and then move, as Lendl does. Even John McEnroe, his best performance, Lendi was still Since the players of my era moving 100 late, which is fatal

Borg was the best player I certain Budge would have have seen when it came to added the 1939 Wimbledon to battling his way out of a tight his 1937 and 1938 wins. Who is corner, when he was love 40, to say that Hoad wouldn't have 15-40 or 30-40 down he was won it three times, too, or marvellous. Look how he came Laver, but for professionalism? back so many times from back so many times from. seemingly impossible positions against players like Mark Edmondson, Vijay Amritraj and Victor Amaya during his

It was a shame that Borg had to retire with one ambition -winning the US Open -unfulfilled. But once the Ameri-cans moved their championship to the concrete courts of Flushing Meadow, I knew that

for technical reasons this was one title Borg would never take. Those courts were specifically built for Americans to win on have proved: si Flushing became the Open venue. They give a waist-high bounce, whereas Borg liked a low ball which he could come up-and-over on, to give it the exaggerated top-spin which was one of his greatest weapons.

Borg was, inevitably, a lesser player on those hard courts at Flushing Meadow. The reason he succeeded as well as he did (he was runner-up three times) was a mark of his pride and the fact that he was fitter and concentrated better than anybody else.

If it were possible to have

these time-free championship match-ups, I'd love to get at him! In my day I was just as fit as Borg and just as dedicated: I would have stayed out on court for three days in order to beat him. As for my contemporaries, I think Henri Cochet, one of those famous Four Musketeers of France, would have beaten Borg with his subtlety and because he took less out of himself than Borg did during a match. But for my money, the man who would have given Borg the most trouble was Lew Hoad. He hit the ball so hard and was so quick that he would have knocked him off his

moreover ... Miles Kington

It's funny how guide books omit the most obvious things. None of the books I took to Spain scooter. warned me that "gin" is also the word for the Swiss town of Geneva. Nobody mentioned a sea-food delicacy usually listed on English-language menus as rape-lish". a mistranslation which deserves an article of its own. And none of them ever hinted the central part played, at least in Andalucia, by the

motor-scooter. The motor-scooter, whether in old-style Vespa or a tiny Mobylette, comes as naturally to the Spaniards as shoes to us. or surfboards to Californians. Motor-cycles they seem un-Andalucian hill-town and hearscooter is about to zoom round winding up your window, they the corner. I wasn't too said morosely - they just smash surprised when, sitting outside a the glass and lean in. I've had

restaurant door open and a man ride out of the dining-room on a

The thing is, scooters are so adaptable. In big towns you see businessmen riding, suited, with a brief-case in a little front basket. In Malaga we saw boy-friends giving girl-friends a joy-ride on the back. In the country we saw scooters taking asparagus to market in Granada we spotted a scooter with four people on it: father driving, with a son on lap, and mother behind, with daughter on lap.

The apogee of scooterdom, we were told, is Sevilla, where scooters have become the prime aware of, but scooters are as crime weapon. Never carry common as bicycles in Cam-anything in Sevilla, everyone bridge. Half the Spanish houses said. Two blokes will come past you peer into - I'm a great on a scooter, one driving the house-peerer - have scooters by other prepared to grab your the front door where we would handbag slash your shoulderhave gumboots. Walking up the strap, whisk your jewellery off, deserted white alleys of an remove a limb if necessary. Even at red traffic lights in ing the angry whine of a See Sevilla. They said, scooter grasshopper, you press youself thieves will reach in your car to the wall, knowing that a and take everything his no use restaurant in Coin, we saw the New Yorkers warn me against

muggers, but believe me, it's nothing on Sevilla. I wish we had been told the

same about muggers in Malaga. Malaga is not just a springboard for Torremolinos, it's a fine old town in its own right. The best bit is the Gibralfaro, a high hill near the centre with a half-hour walk up through Moorish remains, castle walls and dilapidated groves, to a parador restaurant at the top which served the best olives we ate anywhere in Spain. The only people on the hill apart from us. though, were lone males, looking like second division poets, or unattached gays, or just unemployed people out for a stroll. They looked a bit sad. We felt we ought to stop and chat to them, but felt shy about it.

h was only later we learnt that they were all prowling muggers. Food, treacherous food

THE FOOD SCANDAL

Are we the chance victims of ill health? Or do we bring diseases upon ourselves?

Geoffrey Cannon explains the growing evidence that links

the food we eat to the

diseases we suffer. And he argues for a radical change

of attitude towards our diet

cancer, coronary heart disease, hypertension, diabetes, diverticular disease, duodenal ulcer. or constipation, there is broad agreement among research workers that the type of diet that is least likely to cause disease is one that provides a high proportion of calories in whole grain cereals, vegetables and fruit: provides most of its animal protein in fish and poultry: limits the intake of fats; and , if oils are to he used, gives preserence to liquid vegetable vils: includes very few dairy products, eggs, and little refined

Harveian Oration. October 1982

e are brought up to believe that good health is good luck, and that illness is anaccident. We speak of death from heart disease as a "tragedy", a bolt from the blue, like being run over in the street. Illness is seen as a mystery best left to doctors. Executives have medical check-ups, apprehensively, and afterwards may say Ok. The quack cleared me." The middle-aged body is thought of as if it were a banger due for an MOT test. And medical technology has devised of as if they were rebores (the coronary by-pass) or component replacements (transplants,

But we cannot trade our hodies in for a new model; we have to make the best of what we've got. What, then, is the best way to avoid heart attacks: strokes and cancers, which between them kill around twothirds of us in Britain? Indeed. what causes these killer dis-

Until recently the medical profession did not know. The term for these conditions was degenerative diseases of complex or unknown actiology meaning "the cause of these diseases is a puzzle, but they come on with old age." In the West, doctors are taught to recognize and treat disease, rather than how to prevent it. Correspondingly, much less than I per cent of the NHS budget goes towards prevention, and of all the parliamentary debates on the NHS in the last 10 years, only one has discussed

But the scale of deaths from the so-called degenerative discases is now so appalling in changing. The rate of death from heart disease in Britain is Thus 66 per cent of the national now around the highest in the diet supplies energy but little or now around the highest in the diet supplies energy but little or world: about 250,000 British no nourishment. It follows that people die every year from diseases of the heart and blood cssels. Drugs and surgery delay death for some, but have no attornational impact. About 100,000 pressed as one of over-con-consumption.

"Whether the object is to avoid British people under the age of 65 die every year from heart disease, stroke, and cancers. The lower social classes are worst hit. Leaders of the medical profession now have come to speak of this rate of premature death in apocalyptic terms, as a holocaust rather than an epidemic, which medicine can do nothing to check. What then is to be done? Within the last 20 years medical and scientific research has come

to show, beyond reasonable doubt, that the fundamental underlying causes of the discases most of us come to suffer and die from in the West, are Sir Richard Doll staring us in the face; indeed, staring us squarely in the face three times a day. We smoke, we drink too much, we don't exercise regularly, we suffer a form of stress better termed frustration": but above all we cat the wrong food. That is to say, western food is the main single underlying cause of

under-nutrition. For we ext

vitamins and minerals.

western food is a killer.

proteins (amino acids).

western disease, Consequently, as with the cholera and typhoid epidemics of Victorian days, research has shown that western disease is fundamentally not a médical problem but a public health problem, with the most profound implications for ourselves, for government, for industry and for educators, as well as for the practice of

o what is the matter with the food we eat in Britain? In the words of Professor J. N. Morris, chairman of NACNE (the now-suspended National Advisory Committee on Nutrition Education) "an extraordinary strength of medical and scientific opinion," in Britain and the West, states that we cat:

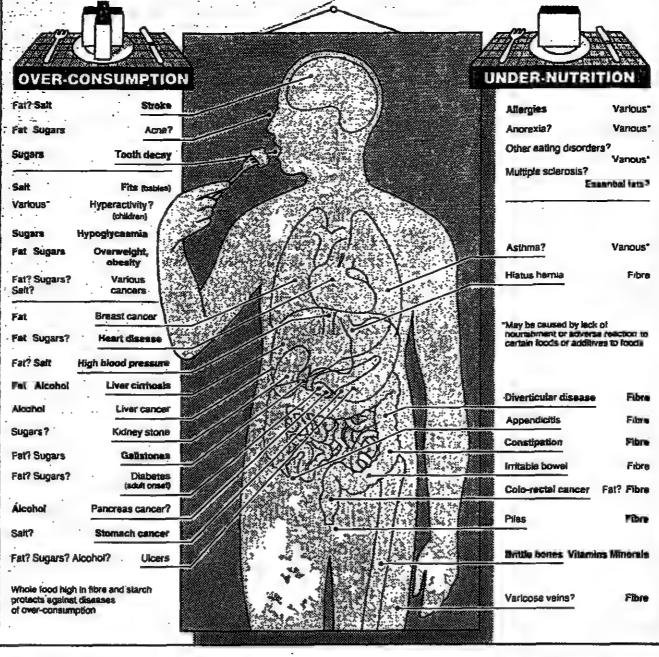

Too much fat, and in particular, loo much "satu-rated" fat, from animal and dairy sources and from processed foods.

Too much sugar, or, to be more precise, too much pro-cessed, "refined" sugars, including sucrose, glucose fructose and syrups.

Too much salt. Two thirds of the sugars we cat is "hidden" in processed foods. The figure for salt is seven tenths or more. Too much alcohol. In this case the problem is not the national average consumption, so much as regular social or

heavy drinking.

In round figures, measured in terms of total calories, 40 per cent of the food we consume in Britain is fat, 20 per cent is sugars, and 6 per cent is alcohol. on average we depend for nourishment on one third of the food we cal

The fatal connexion: Not enough fibre; meaning western diet not enough wholegrain cerea and fresh vegetables and fruit, all rich in fibre - and protein, and western diseases The so-called NACNE report,

issued last September by the Health Education Council, set Diseases and disorders of overout what may be called the "fat, consumption, caused by the sugar, salt and fibre thesis" as amount of fat, sugars and/or being a statement of "broad scientific consensus" which, indeed, it is. The NACNE are listed on the report itself relied on other report itself relied on other figure. Diseases and disorders record by expert reports issued by the of under-nutrition, are caused by Royal College of Physicians, the lack of nourishing food rich in World Health Organization, fibre, vitamins, minerals, essenthe Department of Health trai fats as (DHSS) during the last ten are listed on the right, years. western diseases.

This "epidemiological" evidence is not in itself conclusive. Cynics point out that such evidence might implicate the rise in consumption of plastic buckets or television programmes, as much as western food. To scientists the conclusive evidence is experimental; this too, supports the thesis: • The community. Studies of people asked to change their divided into three types; deadly, cating habits show that their such as heart disease, stroke, risk of disease changes, corres-

ondingly.
The laboratory. Other studies of people and animals decay, constipation, and overgiven artificial diets also con-weight. By the age of 40 the

disease? For example, some people who eat great quantities right, the list is of Western diseases believed to be caused

of animal fat do not suffer from heart disease, which nonetheless kills other people who cat modest amounts of fat (Likewise, those who claim that tobacco is harmless point to the arguably mythical hale and hearty grandfather who enjoys 50 Woodbines a day.) The answer lies in the concept of "biochemical individuality", or susceptibility diseases or causes that remain we are all born different conjectural or not yet strongly resilient in some respects,

One common query is: if

western food is a killer, why don't we all die of western

disease or another.

be thesis is, therefore that if we eat well (from birth) we are most likely to avoid western disease. Whereas, a diet heavy in fat, sugar and salt may lead to heart disease in one person, cancer, diabetes or obesity in another. In the end almost all do in fact die from western disease, and the argument is that western food is indeed the main single underly-In 1984 I asked Sir Richard

Doll if he would change the view expressed in his 1982 Harveian Oration. "I would strengthen that statement now," he told me. "The evidence is even stronger now then it was two years ago." Sir Richard's is not a lone voice. The British Medical Journal in April called on the government "to recogconnected sugars with risk of nize the need for urgent action' to incorporate the reasoning of the NACNE report into its official thinking.
So what's the problem? Why

aren't we all in Britain already well aware of the dangers of fat, sugar and salt? In one word, the answer, in 10morrow's Times, is: profit.

Developed from The Food Scandal by Caroline Walker and Geoffrey Cannon, published today by Century (£7.95).

It's my party and I'll buy if I want to

A girl called Pauline took me to it stank, but then she did have my first Tupperware party, one already just like it.

Pauline is 25 and works in a

Following on neatly shipping office. She is of cereal storer were for Jamaican descent, but has never bowls, which were among the been to Jamaica. She lives in east London with her parents and her two children, but not her boyfriend. The party took place at the home of Sandra, on a smart housing estate behind the docks in Woolwich.

Sandra greeted us and put us in a tiny living room stuffed with furniture and ornaments, I sat on the sofa next to a trolley laden with decorated glasses. near the quietly muttering television - which was never turned off - and opposite a hanging tapestry map of

tamatca.

While waiting for the others to arrive, Pauline got out her knitting while her friend Maxine asked to see Sandra's wedding album, Brown and cuddly in the photographs, Sandra was now rather fat, She worked as a computer operator at Lloyd's Bank.

"What else do you do in your spare time?" I asked her.

"Nothing really."
"Do you go out?"

Eventually a very pretty ndian girl arrived with two cardboard boxes and a suitcase. Kneeling on the floor, she set about arranging them in a pleasing display on a fake marble coffee table. Meanwhile I was trying to work out how to open a plastic jar containing peanuts which I had found beside me, and which I recognized from the display.

said:
"Ah, I think we got the rong one then." "No, no," said her friend.

Finally I passed it to a girl who

"You can keep anything in it. You don't have to keep peanuts."

Before the demonstration we DIAYEO DIDEO DI numbers on the backs of our order forms. Two people won and a friendly argument ensued over the prize of some spoons, a pastry cutter, a thing for scoring the peel of oranges and a tool for cleaning those difficult Tupperware ridges.

Then we were given cata-logues, or books, and Maheen assembled the utensils for making cheesecake. Using a paddle-scraper (52p), a lidded mixing bowl (£6.95) and a collapsible pedestal dish (£7.38), she made a filling with cottage cheese and "Dream Topping" that looked like bleached sick.

Conversation broke out as she genteely decorated it with mandarins using the tongs at £1.77, but she maintained the chilly politeness and addressed herself to the sorting of her vocabulary for the next stage. Placing the cake on one of a set of three chrome occasional tables, she delved into the display and produced a tall, Darrow box. Sandra, this is your gift for

having this party." Unseen in the doorway, Sandra wrinkled her nose. It's for storing her nose. "It's for storing cereal," Maheen went on. "The lid in the top helps you pour your cereal, and it's got mirror this side, and mirror that side." She referred to transparent windows, one down each side.
That's so you can see what you got inside. It looks good inside your cupboard or outside your cupboard. Personally, myself. I like it very much." Personally, herself. I think Sandra thought

Following on neatly from the cereal storer were four little smarter things there, but still totally superflous, "These are very ideal," said Maheen. "You can use them to keep cereal overnight for the kids, so in the morning they don't have to rush about looking for it."

As a child I was made to get

my own cereal, which by these standards would amount to cruelty. These bowls, like all Tupperware goods, are claimed to be labour-saving. Well, if they mean "enabling men and children not to have to lift a finger" - then that's absolutely right. Other claims in the catalogue are: "time saving. energy saving and money saving." Taking "energy sav-ing". I guessed that to wash up everything in Maheen's display would take about 12 hours, but as that's strictly speaking only half a day, I suppose that's right too. Looking at the prices, "money saving" is definitely true if you would normally buy gold, Lastly, the method of shopping itself is also claimed to save time. And I'm sure that if you've got a wooden leg, three hours to buy a few picnic bowls is quite fast.

Actually, everything in the range looks like picnic bowls. only in different shapes - threepiece vases, hamburger presses - and unusual colours; olive, claret, mandann, burgundy, The function of some is so specific as to be confusing. A woman at the back stood up and pointed to a large square

"What's that actually for." she asked. "Only I've got Maheen described a lengthy process involving the heating of partially cooked rice. Personally, myself, I've devised a system whereby I put the rice in the pan and then take it out

Having demonstrated all the products. Maheen was now collecting orders. Scized suddenly by a false sense of urgency, some people were adding more items, then removing them again, becoming manic with the excitement. Pauline's friend Lisette alternated between a piente set and a regetable dish for ages.

"Do you really want the vegetable dish?" said Maxine who was trying to help. "Yeah." said Lisette. "I've been after it a long time." Then she got the picnic set reduced to £9.99. I wondered how many picnics she goes to in East Ham. The relinquished vegetable dish has

a section at the bottom for hot water and cost £8.30 - about the same as the very best French oven-to-table which lasts you a lifetime. Mind you - so, it seems, does Tupperware. Guaranteed for 10 years, it is only guaranteed to be out of your life when you bury it or nuke it. It might end up being the last future reminder that we were ever here.

On the bus going home. Pauline showed me the gift she had got for booking her own party. It was a tiny white bowl, with a lid, attached to a keyring. "It's for carrying pills or things when you go away," she told me. I looked in the catalogue, but "Wee Valium Storette" wasn't there.

THE TIMES **DIARY**

Mark and marksman

A question will be asked in the Commons today after the disclosure that Mark Thatcher was being driven around London last week in a chauffeur-driven car with a land Yard. Some ministers in more sensitive positions receive no such protection, and MPs will undoubtedly demand to know why Mark or "Sanjay" as he is known - should be accorded such privileged treat-

The first threats against "Sanjay" were reported in March 1982 after the publicity surrounding his rescue from the Sahara during a motor rally. But yesterday a Downing Street spokesman said that protection was being maintained, and admitted: "It is a police car. He is entitled to protection." Scotland

Yard refused to discuss the matter. So why had "Sanjay" decided to return home after his much-publicized departure for America? Could it be a business trip which just happened to coincide with summit? An official of British Car Auctions, owners of Lotus, for whom "Sanjay" works as a director, would only say, "I am glad we know he is somewhere."

Time is money

Mrs Thatcher is said to have offended the powerful Inter-American Development Bank by refusing to spare time to meet its president. Antonio Ortiz-Mena. who arrives on an official visit here today. The president, who is accustomed to receiving head-ofgovernment treatment, has further been told that no Treasury minister is available to receive him. At a time when the world is focusing on the huge debts of some Latin American countries - with British banks among the main creditors - Ortiz-Mena, who has the power to provide up to \$50bn in credit capital, is said to be singularly unimpressed by Thatcher's priorities.

• Mgr Bruce Keut announced there were 200,000 at the CND's Trafalgar Square rally on Saturday, and, like a pantomime dame, got the crowd to shout back the figure. Strange. My CND mole tells me that on May 5 its campaigns department announced that only 35,000 could be safely accommodated in the square.

Suffolk punches

This is not the Aldeburgh Festival's year. The organizers, anxious to make it more accessible, had hired the Finnish schooner Stena of Sipoo to transport theatre-goers to the finale later this month. On Friday it sprang a leak in a gale and had to be towed to safety. While that drama was going on, a special train, named the Aldeburgh Festival, was due to leave London with a throng of theatre buffs for the festival's opening night. It never left Liverpool Street. Apparently the guard forgot to turn up.

Art form

Lord Gowrie, the minister chosen by Mrs Thatcher to spearhead her opposition to freedom of information, is doing his stuff. He is refusing to release the results of a study into how effective the Thatcher administration has been in improving information's flow. When asked by our own Peter Hennessy to produce correspondence between permanent sec-retaries and the cabinet office, which formed the basis of the study. Gowrie protested: "It would not lend itself to publication." We should be told, and we will - when the correspondence is declassified in the year 2014.

Two authors selected for the Book Marketing Council's "Writing on Travel" promotion have been having difficulty travelling to London for Wednesday's launch. Jonathan Raban planned to sail in from the Isle of Man but ran into a storm and had to abandon his 30-foot ketch at Pwllheli in North Wales. Dervla Murphy was to have hitchhiked from her home in Lismore, County Waterford. But as she emerged naked from a swim in the sea she was gored by a bull and will now have to fly.

Waveney Valley Mountain Rescue Association has just held its monthly meeting. Nothing remarkable in that - except what can its members be rescuing? They are on the Norfolk/Suffolk border with not a mountain in sight.

Noises off

Labour chief whip Michael Cocks has lodged an official complaint with the BBC after a row crupted minutes before Newsnight went out last Wednesday. It was provoked by the inclusion of Nicholas Ridley, Transport Secretary, in what Roy Hattersley believed was to be an interview with him alone on alleged government interference in the miners' dispute. Hattersley claims that the Government got wind of his appearance and by the time he reached the studio just before the 11pm broadcast the BBC had been persuaded to include Ridley. News-night counters that no Tories had agreed to appear until Hattersley was invited at 6.30pm, but that Ridley changed his mind - by which stage Hattersley was out to dinner. The real loser, however, was Sir Geoffrey Rippon MP. He too belatedly agreed to appear, and arrived to find Ridley had superseded him. He was not pleased.

Bernard Levin tells how the Tories assisted a hard-left press fiasco

The News unfit to print

Few who have followed the conduct of Islington Council since it fell under the control of a fanatical group of Militant-Trotskyists will be surprised at the news that the ratepayers of that long-suffering borough have just been mulcted of a sum which even the councillors admit is at least £26,000 (the true net figure is probably around £100,000), and which was laid out on an attempt to damage or destroy the independent local newspaper, the Islington Gazette, in revenge for persistent criticism of the council's political lunacies, waste of ratepayers' money, and intolerance.

Only the most hardened of cynics, however, will readily believe that in this enterprise. Islington Council was actively abetted by Mrs Thatcher's government, and indeed that the councillors could not by law have looted the citizens of Islington in pursuit of their murky purpose if it had not been for Government legislation which the Government was warned would lead to precisely this result. Yet thus it was.

The lunacies and extravagances of Islington Council have been count-less; they include the "official" prohibition of Irish jokes, the flying of the Red Flag over the town hall and the proud display of a bust of Lenin, a grant for the purchase of gym-mats for lesbians, and another for the production of "non-sexist jigsaws for the under-fives," the attempt to force local firms seeking council business to institute closed shops, a decision to let squatters jump the housing queue and stay in the houses they had occupied, and an extra £5-a-week "leaf fall allowance" for council street sweepers "to compensate for the extra manual work of sweeping and disposing of leaves".

The campaign against the Islington Gazette began as soon as the capture of the council was achieved. The excuse for it was a dispute between the publishers and the National Union of Journalists; this had gone on for over a year, but had finally been settled by mutual agreement just before the town hall was captured. Despite the settle-

PORTSMOUTH SOUTH

THE CONSTITUENCY

ment, one of the first actions taken by the new masters of Islington was the institution of a boycott of the paper; this was announced in a document circulated by Councillor Alan Clinton, headed, "The Gutting of the Islington Gazette", which acknowledged that the union dispute was over, but nevertheless declared that "the party must tighten the

Labour councillors, and council staff, were forbidden to speak to the representatives of the Islington Gazette or communicate with it, all facilities apart from those the council were statutorily obliged to ere withdrawn from the paper. and all council advertising other than notices which by law had to appear in the Gazette was cancelled.

The Gazette called in the Local

Government Ombudsman, and also

appealed to the Press Council, Both

condemned the Islington councillors in unqualified terms; the Ombudsman found that they had been guilty of maladministration, and the Press Council found that their action was "a serious and deplorabe example" of disregard of their "responsibility to the public as a whole". (The Council, in an area of high unemployment, had even refused to place job advertisements in the Gazette.) The Council ignored both sets of findings, and continued with the editorial and advertising boycott; it ended the former in August 1983 ("We need to be able to reply to every attack on our tenants and those who benefit from our social services . . "). but the advertising boycott remains in force, though even Camden Council, ILEA and the GLC itself place advertisements. on strictly commercial consider-ations, in the Gazette.

The next move, logically enough, was for Islington Council to start its own, rival, paper, to ensure it had the greatest possible damaging effect on the Gazette, it was to be given away free, but since the ratepayers were to be forced to finance it, the question of making it pay could be ignored. Councillor Mrs Veness (perhaps the most extreme of all the extremists on the council) said with rare but engaging candour (in an

FRATTON

Worker, journal of the SWP) that "Labour Party propaganda is very weak. . . . There's no counter-propaganda. . . . In Islington . . . we're starting up our own alternative paper to the Islington Gazette as a

co-operative".

Now for the figures. To buy premises for the Islington News £76,614 was provided, with a further £37,417 for refurbishment of the building; the co-operative (naturally composed of those with political views acceptable to the council) was also promised £17,000 to pay the first two years' rent. Next came £20,000 to buy printing equipment, a bank overdraft of £20,000 for working capital provided commer-cially for this obviously uncommercial venture because the council had guaranteed the bank against loss, a loan of £50,000 from the GLC's Enterprise Board, a further loan-guarantee of £4,000 and finally a total of £8,500 provided by the members of the co-operative them-selves – the only sum anybody but

the ratepayers stood to lose. So obviously doomed was this venture that the Borough Employment Officer gave the council formal warning to the effect that "there must be doubt about the viability of a project with such a high level of borrowing and a disproportionately low capital con-pribution from the principals"; pevertheless, the scheme went ahead, and Mrs Veness even claimed that there had been "a detailed feasibility study that suggested that the co-operative would be a sound commercial venture".

When the paper began to appear, it was further subsidized by the council, which gave it up to £600 a week in advertising, despite the fact that practically pobody was reading it and the advertising was having no effect; the paper itself offered uncommercial rates to try to attract private-sector advertising.

The Islington News lurched on for exactly 22 weekly issues, then collapsed into the inevitable bankruptcy. The sufferers are, of course, the ratepayers, who should take note

Portsmouth South, where a parliamentary by-election is held on Thursday

paper's collapse included an ominous warning to the effect that the council would be willing to consider applications for "further co-operative initiatives".

One of the only three opposition members of Islington Council, Mr David Hyams (SDP) has said in discussing this affair that, "The present council leadership makes Roy Hattersley look a man of principle", as succeinct a summary of a complex matter as I ever expect to read. But the most shameful aspect of the sordid business lies in the fact that the present government, though warned of what would happen, insisted on legislation that made it possible for the Islington News to come into existence. When the Local Government (Expenditure Powers) Bill, an innocuous measure certainly not intended to make possible such folly and waste, was going through Parliament, the Islington councillors were legally advised that until it was passed they would not be able to finance their paper in the way they wished, and the Government's attention was drawn to the consequences; a number of SDP peers put down an amendment which, while leaving the measure's intended effects untouched, would have blocked the drain down an intended effects untouched, would have blocked the drain down which the Islington ratepayers' money was subsequently poured. One of those inadequate but pliant junior ministers whom all governments find it useful to employ. Lord Bellwin (the David Waddington of the House of Lords), waved aside the warnings, whipped his majority and had the amendments defeated. The final irony of the story, though Islington ratepayers may need somebody to explain the joke to them, is that it was Lord Bellwin who, when he learned of the Islington councillors' vendetta against the Gazette, said that "action of this nature is contrary to the public interest and is to be deplored. . . the public need for information about local government matters can only be met if there are good relations between local authorities and the press"

Isle of Wight

George Brock reports on the twin challenge to the Conservatives' long supremacy in

Aidershot

There is a growing fear among politicians and businessmen alike that some of these virtues may be lost. From the Government's point of view, such a loss would blacken not only its own name but the name of competition and free enterprise.

Mr Norman Tebbit shares these anxieties. The first and simplest thing to do would be for him to set up at the Department of Trade and Industry a super fraud unit, stuffed

Ferdinand Mount

Keeping the City off limits to fraud

Somewhere lurking in the womb of time and probably lurking in the City of London, there sits The Man Who Will Rock The Government He will be called something like Hermann Heimweh or Guido Ossobuco; he will probably look foreign too; at any rate swarthy enough to send a shiver down English spines. Heimweh/Ossobuco will be described as a financier or commodity speculator. And he will have discovered an ingenious method of syphoning millions out of his multifarious businesses without attracting the attention of the Inland

And after we have all gawped at pictures of his mansion and his yacht, the politicians will start: This is the unacceptable face of Thatcher's Britain, a devil-take-thehindmost society based on callous

greed and cynical rapacity. There is, in short, nothing to unsettle a Conservative government, two or three years after an election, like a fruity financial scandal. It crystalizes discontent, offers an outlet for moral outrage and fills the air with the smell of decay. In previous cases, all this has been intensified by a general uneasy feeling that the British authorities are slow and listless in the prosecution of fraud. We do not, most people think, handle these matters as well as they do in the United States, where crooked tycoons are caught and sent to jail. And most people are right.

The shake-up in the City is bound to increase the anxieties. Pulling down the old barriers between banker, broker and jobber may be the only way for London to keep its place as an international centre. But the absence of rules also appeals to Ossobuco and Heimweh who love to deal out of hours, off the floor and in the unregulated dark.

There is no need to romanticize the City as it is, Stockbrokers, though preux chevaliers almost to a man, have been known to deal on their own account in a manner which left widows and orphans rather at the back of the queue. But the old barriers have provided a continuous, transparent market. You could see who was selling what, to whom, at what price and on whose behalf. And the club has the virtues of the discipline of the officers mess, even if it also has the defect of not caring very much about the outside world.

a modicum of low cunning. But how is Mr Tebbit to protect the investor and the pensioner, not against outright fraud, but against subtler forms of maltreatment? The ashion now is to talk of self-regulating agencies (SRAs) as the answer. But, it will be asked, what are the Stock Exchange Council and Council of Lloyds but SRAs? After all the kerfuffle we might well end up with something not wholly unlike what we already have, Indeed, there is already talk of the traditional distinction between brokers and

usual Whitehall territorial squabble;

the Attorney General jealously guards his responsibility for the

lawyers, the Home Secretary ditto

for the policemen. But sooner or

later, one fancies, we shall have to have a squad of DTI tough eggs, sharing, one hopes, the best characteristics of their master, a

quick brain, a suspicious nature and

second-line stocks which are less frequently traded. It is vital at least that the new arrangements should include the public registering of bargains. And whatever SRAs do turn up. they must include a sizeable wedge of outside members, to see fair play for savers, customers and policy-hold-

jobbers reappearing at least for the

ers. Transparency is all. Do we need a super-SRA on top of all the others to ensure that say. the Stock Exchange rules don't conflict with the commodity brokers' rules? Some of the bodies being coordinated are not enthusiastic. Yet demarcation disputes there are bound to be, and the City will find it hard to do without some kind of TUC to sort out differences between its member unions, even if, like the UC, it has little or no power.

Elegant economy of effort is surely the best. There should be as few SRAs as possible, no more than six (which means less sniffiness of "we don't want to be lumped in with those ghastly unit trust people" sort), a minimal super-council, and as few rules as possible – but those vigorously enforced. The regulatory

hand must be light but firm.

The most difficult thing of all is to frighten off Ossobuco and Heimweh by convincing them that in Britain they run a real risk of detection and punishment. The effort required to track down, and make sense of, all the documents in a fraud case is formidable and costly; presenting the case so that a jury can understand it is harder still; yet we are rightly reluctant to depart from the jury principle in cases where the defendant may be deprived of his liberty for a good long stretch. Would a panel of judges sitting with lay assessors be acceptable? The loss of a jury might be a price worth paying for convincing the public that fraud does not pay.

Anne Sofer

How Europe could help London

When I visited Halesowen College which is a "tertiary college", and the newest example of that happy institutional marriage of the sixth form and college of further education - I came across a roomful of young to-middle aged men, all sturdily built and brawny, slicing cucumber with precision and arranging salad delicately on little plates. They looked more like steelworkers than catering students, which is not surprising because they were.

Here were redundant steelworkers undertaking a catering course on full salaries before they took their redundancy money and set up their own restaurants. All, it was explained to me, by courtesy of the EEC, and there were more golden eggs coming from that goose next year when the college starts other similar courses.

This is an institution which seems to exploit the European connexion to the full. The catering department is developing a flourishing exchange system of staff and students with a college in Blois and is even laying down a selection of its "own label" Loire wines for the training res-taurant. It is good to meet such joie de vivre on the edge of the economically depressed Black Country and in a local authority (Dudley) notorious for its meanness.

The college, operating largely from Portacabins on the building site which will eventually be its campus, improvising wildly to provide a full sport and recreation programme with no facilities and hardly any budget, shows all the entrepreneurial vigour that new institutions are sometimes blessed with. Go-getting for Euro-cash is one aspect of that.

Returning on the train from the Midlands I brooded on how London and its institutions could emulate the same spirit: to be practical, how we could get more out of the EEC. London tends to feel sore about Europe; its current political leadership fosters a mood of "there's nothing in it for us". Yet the possibilities of the European Social Fund have never been properly exploited. The Alliance candidate in the Euro-constituency of London Central, Ernest Wistrich, was astonished to find, when he made inquiries, that the only two projects being funded in this large patch were two he had indirectly initiated 10 years ago when he was chairman of the Camden Committee for Community Relations.

Where London does indeed lose out, however, is the European Regional Fund. Greater London, considered a single region, is the most prosperous in the UK; it is even well above the EEC average. But the inner city boroughs within it are the poorest in Britain and must therefore rank very low indeed in European terms.

I have now grown used to the looks of hostile scepticism with which this argument is greeted in the North and Midlands ("What, deprivation in the South-east? You fat cats down there don't know what the word means!") So I have taken to carrying around with me an interesting document from the Department of the Environment which lists the top 10 local authorities in the country on four different criteria of deprivation. Of the 40 names, only four are not London boroughs. Hackney is number one on every list. Six other boroughs - Tower Hamlets, Lambeth, Hammersmith, Islington, Haringey and Newham - are on every list, and a seventh -Wandsworth - is on three out of four. Inner London is desperately in need of investment, infrastructure renewal, retraining schemes. There should be a major campaign to establish our eligibility for European regional funding. This is why there is a connexion

between the great debate on the paving Bill which is taking place in the House of Lords today and the Euro elections on Thursday. The paving Bill is the highly undemocratic first step in depriving London of a voice. The fact that that voice is at present less than wholehearted in arguing our case in Europe is regrettable: there is something contemptibly inconsistent in the spectacle of Labour members of the GLC advocating withdrawal from the Common Market and then at the same time whining, as they do, that no EEC institution has so far been allocated to London. However, it would be reasonable to hope that a future GLC would be more positive. Other major European cities employ full-time "ambassadors" in Brussels, making sure that no possibility of new investment or

project funding goes unnoticed and untapped. There would be an embarrassment for either a Labour or a Conservative London authority in establishing such a position, for different reasons; for Labour be-cause of their deep reservations about the whole enterprise, and for the Conservatives because they would be reluctant to stump up the matching grant which many of the programmes require. Maybe that is why this idea has never been pursued. But it is now more necessary than ever, and if the Government succeeds in abolishing the GLC, the responsibility will devolve entirely on London's MEPs. The Lords vote today, and Londoners' votes on Thursday, do matter.

The author is the SDP member of the GLC/ILEA for Camden, St Pancras North.

Could Pompey start a shift in the political wind?

speech, delivered from a grassy mound on the edge of a council estate, included deft allusions to his roots and naval family background and a gentle reminder of the public investment which rebuilt much of Charles Dickens ward, razed by German bombers aiming at the nearby dockyard. The estate, composed of grey twostorey maisonettes neither beautiful nor grim, today sports a striking number of red, white and blue Alliance posters in the run-up to the parliamentary by-election on Thursday. They are certainly not proof

The reporting of Thursday night's result may well be preoccupied by the exact size of the Conservative majority. But Portsmouth South is a constituency sufficiently normal for the south of England to make it a good indicator in the battle for the anti-Thatcher vote - the tussle between Labour and the Alliance to be best placed to profit from any future fall in Conservative popu-

that the Alliance will end Conserva-

tive domination of the seat, but they

are evidence of where the real fight

larity. Portsmouth has never been a prosperous city but has no pockets of real poverty; unemployment is close to average and private and council houses alike are in fair condition. The long rundown of the naval dockyard at the western end what was once a workforce of 8,000 will be down to under 3,000 by the end of the year - has been gradual enough for at least some of its employees to find work in the local

service industries. Electronics firms such as IBM. Marconi and Plessey all have plants to the north of the constituency and employ Portsmouth South voters. PHS City and constituency are permeated dockyard, there were once army and marine bases inside the constituency and many servicemen return to the area to retire or, before retirement, bring relatives to live nearby. The Ministry of Defence is a large indirect employer. Mark Payne, the Alliance's canvass manager, ran a business in Portsmouth a decade ago and reckoned then that 40 per cent his customers and employees worked directly or indirectly for the

ST JUDE'S WARD

The Southsea esplanade and the Victorian villas behind it are Tory heartland. Tall terraced houses in pastel colours form ranks of small, unpretentious hotels, some of which proclaim: "Guests wanted no experience necessary." The remain-ing houses without hotel signboards usually turn out to have the multistorey doorbells of flat-dwellers.

Will any of these votes float and change allegiance? Not many. John Hudson, who runs the modest Worth Hotel, was considering the possibility. He retired 20 years ago from the Navy, in which he had been a catering officer, and now runs an establishment once patronized by Rudyard Kipling's mother. The great man sometimes came for tea.

"I don't think I will change. It would be to the SDP if it was to be anyone else, but I think I shall stick where I have always been. The Conservative government's doing the right thing. If I did change it would be because the SDP man is a local man. He's done a fairly good job in the past, he's been good for the community and he's not out for his own ends.

HIGHLANDS

"But then the economy being as it is you can't expect everyone to be gunwales under with work, can you? Until there's an upturn you can't have it a lot different. Or you can have it the other way and have a worthless pound."

Just under a quarter of Portsmouth South's voters are pensioners; it figures on the list of the 50 parliamentary seats with the highest pensioner populations. "I should think that they are mostly Conservatives here," said one hotelier after emphatically declaring he would not go near a polling station and glancing up and down the scafront. Not many communists."

Besides pensioners, Portsmouth South has two other populations above the average: students and cyclists. No doubt the two groups overlap. Portsmouth Polytechnic is now one of the largest in the country, with about 7,000 students, haif of whom live in the constituency. It is a transient population and a problem for canvassers. One party doorknocker tried a house of 12 flats and found that eight residents had

moved in the previous year. It seems improbable that Portsmouth South will see a two-party fight again in the near future. A non-Conservative can hope to win only by first undermining support for the competing non-Conservative. Although starting from a promising background, it looks as if the Alliance attack on the Labour vote will merely erode, and not demolish.

T Affluent and retired owner occupied

Each O represents one census enumeration district (ie 150 households)

Private flats and bed-sits

Council housing

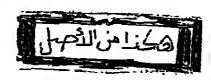

Other owner occupies

Labour's share of the vote 20 years ago was 36.3 per cent. It peaked in 1966 at just short of 40 per cent and has been in remorseless decline ever since, interrupted only briefly by a small rise between the two elections of 1974. Last year it should have been boosted by the transfer of three Labour wards, Fratton, Milton and Charles Dickens, from Portsmouth North, It fell by 10 per cent, putting its candidate then and now, Mrs Sally Thomas, third behind Mike Hancock, the SDP's man on both occasions. Both are local councillors and making much play of the fact that the Conservative, Patrick Rock, is an imported outsider.

But in spite of the bustling community politics and processing of residents' "grumble sheets" at Alliance headquarters, hopes rest too narrowly on their candidate alone. There is little local Liberal activity and community politics have not gone very deep for very long. This weakness is reflected in patchy Alliance results in council elections in Portsmouth and elsewhere and writ larger will be reflected in a small share of the Euro-election vote.

As elsewhere, the Alliance canvassers have found that the "softest" Labour votes are often to be found among the lowest-income council tenants, if they notice that a new party is paying attention to them. As a spokesman for these moveable voters, I could find no better than Mrs Winifrid Mound of King Albert Street

"I'm going to try the SPD," she said. "I haven't voted for five elections and I voted Labour before that Mr Hancock, he helped me with my gas bill - could you believe a gas bill of £500 over two years? One good turn deserves another, I say. I've got a slot meter now,"

BUZZ WORDS AT THE SUMMIT

Summits should not be judged either by the expectations reposed in them by non-members, or by the claims made for their or by the claims made for their questioned by collectivists in success by participants. There is Europe, the Third World or the a tendency to think that summitry is a good thing, which, if it interest is obviously something did not exist, would have to be different, but we should not invented. There is a certain woolly internationalism about this attitude which is dangerous. It invests summits with some unquestioned and inherent authority which they do not have. It attributes institutional qualities to summits with the suggestion of secretariats, action programmes and some self-perpetuating bureaucracy which thankfully they do not have either, yet. The idea of a collective economic management of the capitalist world leading to some synchronised stimuli in the industrial economies was appro-priately described by Sir Geoffrey Howe as "an intellectual trap". It is a trap which everybody in the euphoria of communiques and banquets. seems to want to fall into.

The annual summit of seven leading industrial nations, just concluded in London, has no executive machinery to support its deliberations. It is not supposed to be an executive body. It should provide opportunities for the leaders of the important industrial nations to compare notes with each other so that their pursuit of their own domestic economic policies can, with advantage, be maximised by avoiding misunderstandings or cross-purposes with the leaders of similarly placed nations.

So the summit each year should be more about general principles of economic activity, whose application in the industrialised world provides the key to the success of the industrial

economy, but whose relevance to the future of every industrialised economy is constantly being communist block. Their political different, but we should not judge the London summit by their yardsticks.

However the first disappointment from the London summit is that, much more than its predecessors, it has strayed from . a simple assertion of the principles of political economy on which growth, freedom and democracy have been proved to rely, in sad contrast to the hideous counter-examples provided by collectivist economies. There should really be no room in the summit deliberations for snippets about the Gulf war, or other of that diplomatic pabulum, which seems to corrupt communiques and those. officials who draft them.

The second disappointment is that the leaders of the West have to waste their time arguing about the nature of democratic values. Surely their devotion to the principles of liberal democracy of which the free market economy is a necessary but not sufficient condition, should by now be axiomatic, even for previously professing socialists like M Mitterrand.

It is true that the summiteers have repeated their general belief that the conquest of inflation is an important precondition of stable economic circumstances in which growth can occur, with a reduction of interest rates and budget deficits. They have also gone a small way - very small to redress the rhetorical balance in the arguments about international debt. It seems now to be at least half respectable to suggest that debtors have an

obligation to show, in their domestic and economic policies, that they have to earn the cooperation of their creditors by demonstrating that they are worth immediate relief and lending to again in future.

The summit statement on debt is only a statement how-ever. It is full of buzz words, such as debt-crisis, reschednling and the like. It remains to be seen who will police the relief and re-scheduling operations, since the World Bank and the International Monetary Fund. though often convenient scape goats in the Third World, cannot themselves be exculpated from having helped to create this debtor's priesthood in the first

There is talk of inducing debtors to invite more direct investment. Why have they not done so already, when we hear so often that the World Bank and the International Monetary Fund have insisted on such conditions before consenting to issue loans? Moreover there is still no evidence that debtor nations are being required to subscribe to the normal disciplines of any holder of a mortgage or private borrower from a bank to exchange assets for lending when a loan cannot be serviced. Yet all the big Latin-American debtors could relieve their loan burdens at a stroke by privatising their swollen public sector assets to meet some of the burden of a debt which they

claim to be unserviceable. The summitteers have had their say; but the facts too often suggest something different. It will take more than a few buzz words in the communique to lift the restraints on trade which are often as inhibiting and inexcusable in the industrial countries as they are among the debtors.

IMPROVING THE PAVING BILL

illustrious names in that party's history proposed from the official benches a bill to rectify what his local government spokesman in the Commons had called the anomaly "that whereas" every other borough in the country possesses a body directly representing the ratepayers, no such body exists in London". Lord Salisbury's creation was far from perfect. Few of the years since 1888 have been free of argument not just about the ramifications of a London-wide vote but the boundary, indeed the very existence, of the county. of London: they form a context of controversy in which it is right to place the present government's plans a context conveniently ignored by those who claim the government's consideration of London government is somehow extraordinary or illegitimate. That the Greater London Council is an unsatisfactory instrument of public administration has been admitted on all sides when it suited: Parliament owes the nation a long and full debate when the substance of the "streamlining" plan is put on view later this

vear. In the meantime, though its procedure is clumsily inverted, the government ought to have its "paving" bill in order to secure sufficient information (from the GLC and the metropolitan counties) to elaborate its case, and to lay down a timetable with the proviso (which the of cogent parliamentary debate far better to extend the terms of House of Lords in committee exposes Mr Livingstone's and existing elected members.

A century ago a Conservative should strongly press) that the the left's love affair with extra peer bearing one of the most count-down to abelition should political action and for that not start until after Parliament reason demands a sincere rehas quite clearly expressed its sponse from ministers. assent to the substance of the proposal,

Today, when the bill comes before the upper house for second reading, the Lords should ties and the GLC in 1985-86. some grand repudiation of the government but rather by the expression of heavy scepticism. It may have before it an amendment to the paving bill that will indicate an intention thoroughly to review the clauses of this bill in committee. Such a rider would be an earnest of the Lords' resolve to do what - more and more it seems, since those 1970s' wrangles over the existence of a second chamber - they do well: the sifting and appraising of data and argument and, occasionally, the excision of offensive clauses which are not central to the government's purpose.

Some peers may well feel uncomfortable in contemplating any-action that might seem to support Mr Livingstone's campaign. Of course there is an irony in apparently laking the side of a socialist politician who is a creature of tiny party caucuses and procedural sleights-of-hand. Of course issues surrounding the reformation of metropolitan government have been opportunistically seized as a focus for opposition by those antagonistic to the national government's of hand-over from one tier to wider purposes. But the very fact another in 1985-86 it would be

The concession that must be made is over the so-called interim arrangements for admin-The local government franchise is, it has to be said, a debased system of election, marred by a prevalent apathy and a disconnexion between fiscal incidence and ballot box preference. But that is no reason for the contempt of local electoral choice contained in the paving bill's provision for replacing the set of councillors elected to the GLC and the counties with an unwilling gang of nominees from organizations with a different electorate and separate purposes. The point applies not only in

the GLC where the procedure

would result in replacing Labour administration with Tory. It is just as wrong in the metropolitan areas where the resulting interim body would be Labour in composition: City of Manchester councillors were not elected to order, even briefly, the affairs of an entity whose writ runs in Oldham and Stockport. For the government to translate councillors even as a stop gap from one tier to another is to weaken the main plank of its reform package, the concentration of big city government upon a single tier. In the unsatisfactory circumstances

BLIND JUSTICE, NIGERIAN STYLE

The military regime that seized hold the trials in secret: the press power in Nigeria on December is admitted only to hear the 31 has begun a series of trials judgment read out. The military before military tribunals of authorities have tried to justify former politicians accused of this by saying that the press misusing their offices in various would distort or give the wrong ways, It is right and necessary emphasis to evidence if the trials that corruption be punished, but were open. The real reason, some of the procedures now adopted arouse misgivings; it is is that some accused have equally essential that justice be threatened to air counterseen to be done, and this is not allegations of corruption against

happening in Nigeria. The decree setting up the present rulers. so-called Recovery of Property The first Tribunals which are sitting in Lagos and four other cities has some objectional features. There is no appeal. The minimum sentence is 21 years in prison (the maximum is life imprisonment). Although a judge will sit with senior officers on each tribunal, his task is only to advise on points of law. In some matters the onus of proof is moved onto the accused: if he has enriched himself it will be assumed to have been corruptly done unless he can prove otherwise. The Nigerian Bar Association protested against all these points and decided to

boycott the tribunals. Even more serious than the according to Nigerian observers, military men, including the

The first trial under this decree resulted in the former Governor of Ogun state, Chief Bisi Onabanjo, being sentenced to 22 years' imprisonment. He. was found to have obtained for his party, the Unity Party of Nigeria, a "kickback" of about £2.6m from a building firm awarded a £26m contract. There was no suggestion of personal enrichment, and 22 years seems harsh

Two other trials, held before military tribunals set up under different decrees, also cause concern. The Exchange Control (Anti-Sabotage) Tribunal has improperly punished. But sentenced another former the cost to the regime of governor, Samuel Mbakwe, of Imo state, to 10 years' imprisondecree's failings is the decision to ment. He is said to have illegally high.

changed naira into dollars in order to support his daughter at school in the United States Again ten years seems excessive for doing something that was done by every Nigerian who could afford to.

Secondly, the Public Officers (Protection Against False Accusation) Tribunal is trying two journalists from the responsible Lagos newspaper, the Guardian, for allegedly publishing false information about plans to appoint ambassadors. The verdict is likely to be announced today or tomorrrow. But the decree, which allows for imprisonment of journalists who get thing wrong and the possible closing down of their newspapers, is most alarming to libertarians.

The Nigerian military government has more than 500 former politicians in detention. Trials of various sorts will go on for a long time. The public is undoubtedly keen to see people who enriched themselves mismanaged trials, both internally and internationally, could be

to paving Bill

From the Leader of the Greater Manchester Metropolitan County Council and others

Sir, Philip Webster is undoubtedly correct (June 7) in saying that there is far more opposition, especially among Conservatives; to the principle of the so called "paving" Bill. because it cancels elections.

The Local Government (Interim Provisions) Bill which enters the House of Lords on June 11 abolishes elections to the metropolitan county councils and the GLC, it abolished directly elected councillors on these councils and replaces them by appointed members and in the GLC transfers political control from Labour to Conservative without the electorate having a right to vote. These measures are constitutionally unprecedented and represent a serious attack on local democracy.

The Government's White Paper

on its proposals brought massive criticism and opposition from large numbers of respected bodies and organizations representing industry, commerce and the professions. The Government is still smarting from the revolt against its proposals by Conservative MPs during the debate on the "paving" Bill in the House of

The feeling among these Con-servative MPs was best expressed by the Rt Hon Edward Heath when during the debate he said of the Bill, "it immediately lays the Conserva-tive party open to the charge of the greatest gerrymandering in the last 150 years of British history".

It is no wonder that Labour and Alliance peers have agreed to vote together to condemn this Bill in the House of Lords. It is perhaps ironic however, that the future of the 1985 elections should rest with hereditary

Teachers' pay claim

From the Headmaster of Southgate

Sir. John Vincent (feature, June 6) seems to believe that for teachers "to walk out on their pupils to win greater public respect" diction in terms and worthy therefore of his sarcasm.

Yet, interestingly enough, Professor Vincent's quaintly worded paradox is quite, quite true. By walking out of school on

from school when their lessons cannot be covered for absent colleagues, and by refusing to attend staff and parents' meetings held out of normal school hours, and by declining to organise clubs and teams after school and at the weekends, teachers have forced the public, perhaps for the first time, to realise just how much our national education system has come to depend on a truly massive injection of the teachers' own unpaid time in order to function.

And I, for one, am beginning to like the regime. There may be more work to do resulting from the teachers' industrial action, but it is all in school hours. I suspect that there may be thousands of teachers, and head teachers too, no doubt, who will, like me, be very loth to return to the old pattern ... unless we are very well paid indeed for our time. We like our new-found freedom to have our evenings to

After 31 years in the teaching profession, 10 of those as a head, I may of course just be running out of steam. I prefer to believe that I have come to my senses at last. Yours faithfully.

PETER TARGETT, Headmaster. Southgate School, Cockfosters, Hertfordshire

Rooted in the past

From Mr Hugh Peskett Sir, Your cartoonist today (June 5) should not be too certain that the Rev Jesse Jackson has no Irish ancestry, since Alex Haley (the author of Roots) claimed ancestors named Jackson from County Monaghan. Yours faithfully,

LETTERS TO THE EDITOR

United opposition Seeking solution to world debt crisis Fom Mr C. G. R. Leach

Sir, The renewal, not of the world debt crisis, which has been with us little changed for several years, but of its recognition, makes it timely to point out that there would be no financial difficulty whatsoever in

solving it. For example, if the IMF were to offer \$125 billion 15-year 372 per cent index-linked bonds to banks in exchange for selected LDC (less developed countries) debt, the two indispensable aims of long term funding and rate-capping could be achieved immediately.

The LDC debt would be taken

from the banks at a discount, thereby giving rise to some losses (a necessary outcome for those who object to taxpayers bailing out management or shareholders) but the losses would be (a) controlled, (b) pro rata to the mistakes made and (c) voluntary (since banks would not be obliged to accept the

exchange offer).
Confidence in the banking system would be promptly revived and liquidity restored. The IMF would reflect its own low cost of money in the terms of renegotiated debt settlements with the LDCs as, and only as, long term readjustment programmes were agreed and main-

Any good banker could suggest variants to such a scheme; for example, the vehicle could be different, the interest rate could be fixed and provision for additional funding could be made. But the essential point is that this method of approach solves all the outstanding problems without creating any new

The reason why nothing of the sort is being done is that there is insufficient collective political will to do it, political will being generally the product of response to events, not of forethought. A few further cracks in the system (say, a couple of runs on prime banks and a couple of severeign refusals to renegotiate on commercial terms) would, of course, cause enough panic to change the climate overnight - indeed it would be no surprise if the central bankers already have just such a contingency plan in their desk drawers.

Form Mr S. T. Fahm

addition, the military government has made it impossible for lawyers to take proper instructions from some of these detainees, and the various trials which have now been arranged to take place in secret will make a mockery of the legal process in the country and will further divide a society which is crying out for unity to tackle its difficult and massive economic problems.

G. S. SNELL

One of the key reasons for London's continuing primacy in the art market, despite the shift of purchasing power elsewhere, and for the calibre of the scholars that it continues to attract, is its unique richness in facilities for research, chief amongst them the National Art Library, the British Library, and the Witt Photographic Library.

May we, the undersigned, as a cross-section of the users of the National Art Library, use your columns to plead not only for its immediate reopening, but also for it to be given the resources and autonomy to enable it to live up to its title.

Yours faithfully, LASTAIR LAING. WILLIAM RIEDER, C. MONKHOUSE JAMES MILLER. JOHN BASKETT ROGER WHITE. G. JACKSON-STOPS, CHARLES AVERY. **EILPEN HARRIS** NIALL HOBHOUSE, J. MONTAGU, 144 1/2 Sinclair Road, W14. June 4.

Designing courses for horses

From the Vice-Chancellor of The City University

Sir, There is an increasing amount of evidence that the needs of industry and commerce graduate entrants are not being met in terms of numbers and specialisms. Your report (May 25) of industry recruiting abroad is

an extreme example.

At a time when the University Grants Committee and the Department of Education and Science are trying to design the higher education system for the next ten years, it is essential that those responsible should focus on the demand for graduates to meet the needs of the professions, industry and commerce over that period, rather than being mesmerised by the birth rate and the cighteen-year-old cohorL

At the very least, inputs to the debate must be sought from the employment sectors mentioned above and from other Government departments, e.g., Health and Social Security and Trade and Industry.

Yours sincerely. RAOUL FRANKLIN, Vice-Chancellor, The City University, Northampton Square, EC1.

Air on Everest

From Lord Hunt

Sir I cannot retain from joining in the philosophical exchanges in your columns arising from Dr Charles Warren's reservations (May 19) about pushing ever higher the risks

attending mountaineering.
In my submission, the "legacy of personal achievement" bequeathed (Mr Holdsworth, May 28) by Peter Boardman and Joe Tasker, who died on Everest in 1982, consisted not, as Mr Edward Smyth would have it (June 6) in deaths; but in their astonishing record of success and gallant difficulty at high altitude.

I suggest that the philosophy which provides the motive for most mountaineers, as well as an inspiration for very many other people, is not conditioned by the margin of safety referred to by Mr Holdsworth in a quotation from the late Frank Smythe: nor do I believe that Frank. whom I knew well, intended to lay the emphasis on "safety"!

For most of us, the compelling motive of climbing is the exercise of sound judgement in applying our experience and skill to the dangers presented by a chosen route on a mountain. Joe and Peter would not have been the source of inspiration to countless climbers which they undoubtedly remain but for their ability and determination to match skill with risk as closely as they

The acceptance of justifiable risks, rather than the putting of safety first. general philosophy in life.

. To my friend Charles Warren I

would say that, for the young, "enough is never enough". Yours faithfully, JOHN HUNT.

House of Lords,

June 6.

Community radio

From the Managing Director,

Radio, BBC Sir, For your Arts Correspondent to Sir, For your Arts Correspondent to suggest (report, May 31) that the BBC is "implacably" against community radio is simply to misrepresent what I said at a public meeting of "The Voice of the Listener". Nor, as he reported, is there any great difference of opinion

on the matter between the BBC and 1BA, still less a "clash". This is what I actually said: It must make sense to provide comprehensive coverage for popular, existing services before allocating precious wavelengths to a plethora of new outlets, however tempting they may be. Thus, you will not be surprised that the BBC is concerned about the Government's apparent inability to deal

with the radio pirates.

We share the IBA's concern that pirate stations operating without regulation interfere (in our case) with the licence payers' listening and, in many instances, respass upon others' copyright.

However, as I pointed out, legitimate community radio would

real problems in finding wavelengths in VHF Band II to accommodate a whole new tier of broadcasting. The BBC would certainly resist any plan to intersperse low power stations amongst the network and regional radio allocations.

The simple reason is that the listener would be the loser if the pattern of wavelengths were to be any more confused. To allocate say the top part of the spectrum presently carmarked to fill gaps in out network coverage might gaps in our network toverage might provide a clean solution, but it might also mean that we could never get VHF stereo signals for the main national networks to every corner of the land, to those three

and a half million citizens still deprived. Yours faithfully, RICHARD FRANCIS, Managing Director. Radio. Broadcasting House, W1.

When the living is easy

From Mrs Joy Layton

June 1.

Sir, I have always been unhappy about the loss of Whitsuntide as a public holiday and its replacement by the fixed Spring bank holiday. Memories of that damp, depressing break come to me on this golden Whit weekend.

Should we not return to the religious festival, thus ensuring the same number of weeks between the two bank holidays, and trust the Deity to send us good weather?

Yours truly. JOY LAYTON, 18 Grove Terrace, Highgate Road, NW5.

COURT AND SOCIAL

COURT CIRCULAR

BUCKINGHAM PALACE June 9: The Queen and The Duke of Edinburgh gave a Dinner Party at Buckingham Palace for the Heads of State and Government, and leading Delegates attending the Economic Summit, at which Queen Elizabeth The Queen Mother, The Prince of Wales, The Prince Andrew, The Princess Anne, Mrs Mark Phillips and The Princess Margaret, Countess of Snowdon were present.

The Duke of Edinburgh, Colonel, Grenadier Guards, took the Salute at the Second Rehearsal of The Queen's Birthday Parade on the Horse Guards Parade this morning.

Towards extinction of distinction

with a Roman collar. Both the pullover and the politics advertise the desire to break with the traditional stereotype and all it is supposed to stand for.

The stereotype is also increas-ingly threatened by the pressure of certain changes in all the denominations, to the extent that the very distinction between a clergyman and a layman is under assauit.

The Church of England has its own doctrine of the ministry under study, both explicitly in an attempt to reconcile Anglo-Catholic and Evangelical attitudes and implicitly in the more far-reaching proposals of the socalled Tiller report, the church's suggested strategy for the ministry over the next half

century. The Methodist Church is also examining some aspects of the issue, in particular whether lay people may be authorized to celebrate Holy Communion. The Anglican trend towards part-time, non-stipendiary clergy an increasing proportion of the total clerical strength. forces into the open whether there is a real difference between a clergyman and a meaning at all).

layman if they both earn a The definition of "lay", for

Methodism has no rigid rule which says a "lay" person can never validly celebrate the Eucharist, validity not being a very Methodistic concept and authorizations have occasionally been allowed. The conference, at its meeting next month, will be asked to agree slightly broader criteria, so there may be more "lay" people in future with that authorization.

In the Church of England an attempt was made last year to move towards a similar concept of "lay authorization" for the Eucharist, but met too much resistance from the traditional-

The case for it is that it is a natural extension of the idea of "lay ministry"; the case against that it contradicts the Catholic concept of ordination. Between those two clear pos-itions there is a great muddle, usually because words are being used with several different meanings at once (and some words which may have no

to be seen as, the less likely is a salary and both assist at services example, is never spelt out if it clergyman to decorate his neck on Sunday's. The fashion for means one not authorized by that is the case, persons authorized under the rules of the Methodist Church to conduct Communion services are not "lay", whatever they are.

> The Tiller strategy, which is much in debt to Roman Catholic experiments in the third world, is for the enhancement of "lay" ministry, with full-time "professional" ministry falling back into supporting roles. Although the local Christian tian community would have its ordained minister, he would be almost indistinguishable from other members of the same group except for the presiding role allotted to him in the eucharistic rite. The conven-tional role of "vicar" - with dog-collar, vicarage, and sti-pend - would be obsolete.

More subversive than all that, because of who he is, what church he belongs to, and what he says, is the pioneering analysis of Father Edward Schillebeeckx. He is arguing, in books, articles, and lectures, that the ordained ministry is early church, and what that church then could do, this church could now undo or

change possible to imagine that ordination, and other "essential" features of church order, were generally believed to be en-shrined in some missing Fifth Gospel, the one containing the rudimentary tenets of Canon Law. There is no such book, of course, and Schillebeeckx must

it also means there can be no fundamental theological partier to the "ordination" of women (assuming "ordination" retains its significance), for the church would be free to write its own rules. That could include dismantling the remaining bar-riers between the laity and the cleric, if that was judged expedient.

For that trend across a broad front not to reach its obvious final conclusion, the extinction of distinctions, some better arguments would need to be produced than mere reliance on convention (however ancient). The pace and the scale of change buffeting the churches today mean that those things not securely lashed down are liable to be washed overboard.

Marriages

Mr T. R. Troubridge

Church news

June 8 was a tireless worker for the Palestinian cause, and a great Arab patriot and philanthropist. Musa al-Alami was born in 1897 in Jerusalem. His father, a Turkish official who eventually became one of the Deputies representing Jerusalem in the Imperial Parliament in

Until he said as much, it was Constantinople, was an admirer of Great Britain and of Anglo-Saxon education, and sent his

only son to read law at Trinity
Hall, Cambridge.

Returning to Palestine in
1925 Musa entered the service
of the British Mandatory Government of Palestine and was appointed Assistant Government Advocate, Although increasingly concerned at the effect on the Arabs of Palestine of the Jewish immigration which the terms of the Mandate imposed on the Mandatory authorities, he per-formed his duties conscien-tionally for the next ten years.

Once out of Government service his brilliant and penetrating intellect could well have brought him into prominence amongst the Palestinian Arab politicians; but, although consulted by them at every stage he preferred to retain his freedom of action. But his criticisms, not only of the Government but of his Arab colleagues, made him many enemies, especially amongst the extreme faction headed by Haj Amin al Husaini, the Musti of

Work for Palestinian refugees

In 1944 he was selected by the Arabs of Palestine to represent them at the Preparatory Conference of the Arab League which was to be held in Alexandria. On arrival there he found the other Arab Delegates unwilling to admit his participation; but having sidestepped their objections he made an outstanding contribution to their debates, in which he put forward two new and con-

structve ideas. One was to open an Arab Bureaux in all the main capitals of the world to publicise the Arab case. The other was to counter Jewish attempts to buy Arab land in Palestine by opening a fund which, by tiding impecunious Arab landowners over from harvest to harvest and otherwise improving their lot, would remove the incentive to sell as had so often happened in the past.
Both ideas were accepted and

adults, but he resloved that at least some of the children must be saved from the soul-destroying regime of the refugee camps.
He still had some of the
money subscribed for the Arab Development Society, and some private fortune; and he had in addition an idea, that in the Jordan Valley, then a derelict area, there must be water in the subsoil which could be brought up and used for the general benefit of these chil-

In 1950 he secured from the Jordan Government a 2,000acre concession of barren land in the Jordan Valley and, with refugee labour paid for out of the remaining funds of the Arab Development Society, began to dig for water. The concession became a flourishing farm with in one corner, a home for refugee orphans who

trained in useful trades, In 1955, however, during a political crisis in Jordan, a neighbouring refugee camp attacked and pillaged the settlement, which was almost completely destroyed. No compensation was forthcoming, but Musa was determined to carry on and with the aid of bank loans he succeeded. By 1960 farm and orphanage had been rebuilt and extended and the produce of the former, sold on contract to an oil company. was paying for the latter. The success of the farm inspired others to establish farms in the neighbourhood, and a large area of former desert was reclaimed.

In spite of the almost intolerable difficulties placed in his way particularly in the conditions of occupation arising from the Arab-Israel wars Musa continued with his work to the end of his long life.

FINANCE AND INDUSTRY

Executive Editor Kenneth Fleet

Good news on debt, bad news on trade

Actions, as they say, speak londer than words. On her way to the Guildhall to. read out the economic declaration agreed with President Reagan and five other heads of government at the end of the London summit, Mrs Thatcher did a bit of editing. She was, she explained to sympathetic journalists afterwards, merely trying to save us listening time. And it is fair to report that not one of the assembled heads of government (whose delegations had spent hours arguing over the precise wording of this communiqué) turned a

So it was a trivial incident, but one which illustrates an important lesson from the London summit. There were too many distractions from its central purpose, which is supposed to be economic. To keep the press occupied, if not happy, the official "shevpas" tossed out special declarations like food parcels; on democracy, international terrorism, East-West and the Irann-Iraq war, each with texts to be redrafted and argued over. By Saturday afternoon, Mrs Thatcher was not the only person to find it hard to get through a further 12 pages of compromise verbiage.

Even the most devoted supporters of annual summitry cannot suppose it is sensible for world leaders to be presented with a menu of issues that includes the Gulf War, the American budget deficit, international terrorism, a new trade round, democratic values, Latin American debt, acid rain, oil-sharing, development aid, East-West arms talks and an internationally-manned space station. The economic canvas is already impossibly broad for a two-day session without attempting to repaint the whole edifice of western policits at the same time.

-y-

Gis In-

MODEL

A DE

The trouble is not so much that every discussion has to stop at the point of platitudes, without ever progressing to the level of deeper understanding summits are supposed to generate. Platitudes are often comforting and even useful. But some issues need and deserve more the precious, rare commodity of impetus that can only be given by such a group of world leaders, and which these all-purpose summits now spread too thin.

Take the three critical economic issues that should have been the core of this summit. One - the level of interest rates was constrained by President Reagan's election campaign. This made it hard to have a sensible discussion over the American sederal budget deficit, though Mr Lawson seems to have done his not insonsiderable best to place a few punches. He also seems to have been reassured that the American Administration will follow its "downpayment" with further budget cuts, and therefore believe that the prospect for interest rates is detter.

So take the second issue, international debt. Heads of government are not, of course, the right people to reach conclusions on the forms of debt rescheduling, but they are the right people to capitalize on the work of others, and proclaim conclusions that will steady financial markets and belp persuade other sovereign governments of the rewards of financial adjustment.

And that, up to a point, is what the summitteers aimed to do. First, they set the governmental scal of approval on the efforts of their commercial and central bankers to move towards "multi-year" rescheduling for those countries which agree, and stick to, programmes of adjustment with the International Monetary Fund.

This is intended as a reward for theMexicos of this world, and a reminder to Argentina, which is still trying to

pretend it can win the support of the IMF without actually agreeing to its economic conditions. Secondly - and most significantly - governments are prepared to alow their loans (for example, through the Paris Club) to be swept up into the process of multi-year rescheduling. Thirdly, they are determined to find ways of increasing the flows of direct investment caital into developing countries, which means new techniques by the international financial

institutions and the borrowing countries.

None of these ideas is new, but brought together and affirmed by the summittees they could amount to a new code of international financial management, Mrs Thatcher deserves credit for setting out the framework in her opening address. But too many questions have been left unanswered. It is not at all clear how the critical decision as to which governments will qualify for "favourable" multi-year treatment will be taken. Nor is it clear whether a package which reschedules more than one year's debt at a time is all that is meant by favourable treatment.

Of course much of this vagueness was deliberate, and for some very good reasons. The summitteers wish to go on emphasizing the "case-by-case" approach; The last thing these governments wished to do was offer a standard package which every borrowing country wuld then

For much the same reason, governments donot like nasty questions about responsibility for rescheduling decisions, which is why they are all suddenly great supporters of the IMF. And this, in turn, is why several important decisions on international monetary reform have been passed on by the summitteers to wider gatherings: the "Group of 10" industrial nations, and the Interim Committee of the IMF, which has industrial and developing country governments on its board.

It is still not quite clear there is enough basic understanding and agreement among the summit seven to bring the several strands of this argument to a wider conclusion. But what the summiteers achieved on this issue brought even President Mitterrand, the most alarmist of all the heads of government, to say that the bare minimum had been approved.

Through the GIO meeting or the IMF, than generally appreciated in the Rench may finally get something the industry, the City and the which matches up to their demand for an Treasury. Mr John MacPhail, international monetary conference. Where the summiteers really lost way was in their consideration of the third central economic issue - and the one which has been at the heart of summit discussions since

The summit governments reached the weakest possible agreement on the timetable for a new round of trade negotiations under the General Agreement on Tariffs and Trade. Decisions should be taken not now, they agreed, nor even next year, but "at an early date". There is, of course, a perfectly good case for believeing that pressure for a new Gart round is misdirected: that there are worse protectionist dangers than the existing pattern of

The trouble is that the two leading summit governments had both placed their weight behind the push for a new Gatt round, and then meekly accreted defeat without agreeing to any significant alternative. Even superhuman statesmen have only so much puff, and by the time it came to trade, the summitteers seemed to have run right out of steam.

Sell-off timing at risk from decision delays

The Government's timetable for selling assets to the public sector could slip badly if senior ministers do not quickly decide the terms of British Telecom's licence and how to raise fresh finance for Immos, the micro-

Plans for selling Sealink, the British Rail ferry subsidiary, willalmost certainly be put back because financial information essential to potential buyers is not yet available. s British telecom has still not

ettled its dispute with Mercury Communications, the rival set up with Government encouragement, over the terms on which Mercury may use the BT network. The licence whould have been published last

month. The Two critical issues holding up the BT licence are how much Mercury will pay for using BT lines, which partly depends on how much business Mercury is expected to attract, and the ease with which Mercury subscribers can dial into the BT system. Mercury-wants a connexion through

laying the licence before Parliament for 28 days.
Immos is a less spectacular

and less pressing problem, but not much less sensitive. Inmos would prefer a share placement or flotation which would preserve the company's independence. It is pointed out that the Government's veto last week of a £30m placement does not rule out other placements. More than £100m of public money has been invested in Inmos since its creation in 1978.

dialling one digit only, with the minimum of a pause.

The summer recess starts at the end of July, but the

Government is committed to

Senior ministers, however, prefer a quick sale of Inmos and are considering a £50m offer from the American AT&T. The offer is AT&T's second and would guarantee continued operations at Newport, where Inmos is planning a second plant to assemble microchips, transfer the Bristol design team to Icl. The British computer company, and include the Inmos Colorado factory.

Fraser ruling this week By Philip Robinson

The Department of Trade between Fraser, Owner of and Industry is expected to role this week on whether Lourho holder, led by Mr Roland may use the voting power of its "Tiny" Rowland. near 30 per cent stake in the House of Fraser group to oust the chairman, Professor Roland Smith and Mr Ernest Sharp, a

propety expert.

The decision will be the next round in a five-year battle

Ten days ago, Mr Norman

Tebiti, the Secretary of State for Trade and Industry, ordered a Monopolies and Mergers Monopolies and Mergers Commission investigation into whether new actions by Lonhro effectively constituted a merger.

Product quality and style go hand-in-hand with store development

Extracts from the statement of the Chairman of British Home Stores, Sir Maurice Hodgson

"We are pursuing a marketing strategy in both merchandise and food which seeks to associate our brand name and image with consistently superior products which offer the best possible value for money. We have now embarked on our biggest ever

store development programme and this year twenty six stores will be the subject of major refurbishment, although not all of them will be completed during the trading year because of the size and complexity of some of the work involved. In addition, we will have major extensions started in Belfast and Milton Keynes, and new stores will open in Ayr, Cheltenham, Carlisle and Canterbury, together creating several hundred job opportunities. We now have a design which can be applied to

all stores in the chain and which offers a continuous spectrum through the smallest store to the largest. The refinements we have already made to the original concept will lead to further improvements in a continuing evolution.

The capital spend for 1984/85 is planned at about £60m and this level is likely to be maintained in future years. In addition to the planned refurbishment of the whole chain, we will be introducing more food halls, converting more restaurants to the new style and increasing the number of stores in the chain.

THE GILT-EDGED MARKET The case for a change in strategy

May was a perfectly awful defensively into shorter dated redemption yield basis in 1998. month for the gilt-edged mar-stocks with lower volatilities. If yields then are likely to be ket. April was not exactly brilliant either, but market levels at the end of the month were still residing safely within trading ranges established over the previous five months, albeit close to their lower boundaries.

No, it was at the beginning of May that the first significant break in gilt-edged confidence occured, setting the market off into a free-fall phase which has only just been arrested. The reasons for the fall have focused on the continuing pressur placed on US interest rates and the bond market by the problem of funding the US deficit and the resulting pressure on ster-

In addition, there has been an acceleration in retail prices in Britain, a £2.4 billion public sector borrowing requirement for April, a buoyant demand for credit from the private sector, the Guif War and growing doubts about the liquidity of certain US banks. But, behind the noise and

clamour of the market debacle, certain significant and, in some cases, unexpected undercurrents in stock relativities have emerged. Who would have thought at the beginning of a month in which gilt-edged values were set to fall by the order of 4 per cent, that high coupon long-dated stocks would hold their own with their medium-dated counterparts, let

alone outperform them? Blessed with the gift of foresight about the market decline that was about to occur, the conventional wisdom would have been to sell straight or, for those funds which for reasons of their own preclude this option from their repertoire, to switch

stocks with lower volatilities. Given that the gilt-edged the highest (gross) yields in the not. Investors faced with this early 1990 maturities, wide-spread switching of long and the choice are entitled. spread switching of longs into this medium-dated area ought

to have been expected to occur. One widely played tactic that has a particular effect on the long end of the market is that of attempting to beat the performance of the Financial Times Actuaries' Over 15 Year Index. changes in the authorities' Since the instigation of the FT-Actuaries gilt-edged indices in widely accepted that one reason

there are any grounds for considering that the trend is even further.

about to reverse, or continue To answer this, it is necessary to consider the reasons behind the paucity of long-dated stock

higher, he ought now to prefer

Patrick Phillips

1976, the Over 15 Year Index has become an almost universally accepted yardstick against which to compare the performance of the gilt-edged portfolios of those funds with long-dated liabilities.

We have reached the somewhat peculiar situation where the value of funds attempting to outperform the over 15 Year Index now comfortably exceeds its total capitalization.

This distortion can most clearly be observed in the steep downward sloping yield curve with double-digit yields now, at the long end of the market. the Government would be The significance of the size of

this yield differential comes into sharper focus when one considers that the implied balanceof-term yield represented by this situation is as low as 6.2 per cent. This means that for a gross fund manager to buy or hold Treasury 11% per cent 2003/07 in preference to Exchequer 12 per cent 1998 yielding 0.50 per cent more, he must expect the former stock to be valued on a 6.2 per cent, or lower, gross for the Government eschewing the long end and focusing its issning attentions on the short and medium-dated areas of the market has been to leave the long end free for UK corporated borrowers.

Another reason why Mrs

Thatcher's Government has avoided funding long has been the desire and the belief of the Prime Minister and her ministers Treasury inflation be further reduced and that by issuing long-dated stock saddling future generations with

an unnecessary and penal real interest rate burden. So official policy has been to fund prodominantly by issuing shorts, mediums and occasionsnorts, incoming and occasion-ally convertible stocks. This they have been able to do very largely by attracting into gilts the surplus liquidity of the

authorities' advantage to change building society movement. But the abrupt action of the Inland Revenue on February edged partner in the stockbro 23, in altering the taxation basis king firm of de Zoete & Bevan.

of the societies may well have killed the goose that has been laying the gilt-edged eggs. Before that date, the tax regime under which the societies operated has made the prospective net of tax returns from gilts potentially more attractive than those from mortgage lending. Overnight that position was reversed and with present building society inflows falling and mortgage

the very least arguable whether they will wish to, or be able to continue as the major participation in the Government's funding programme. If they now relinquish this role, the mantle will almost certainly revert to the life offices and pension funds, whose preferred maturities are that much longer. In their present frame of mind, the authorities

demand at peak levels, it is a

of 21st century stocks But is there not a strong case for them reconsidering their whole strategy? The balance-ofterm argument used carlier from an investor standpoint is equally applicable, when reversed, to that of an issuer.

are unlikely to produce a stream

In this light, choosing to fund considerably more cheaply in the next century than in the late 1990s can hardly be described as burdening future generations when the implied future breakeven yield basis is only 644 per The logic of this situation.

Patrick Phillips is a senior gill-edged partner in the stockbro-

taken together with the expected

trolled the race to perfection, with Allan Pelper of Australia breaking clear at half distance after the first

seven laborious climbs of Spring Hill at the start of the 9½-mile finishing circuit

ine circuit.

finishing circuit.

Pelper gained almost four minutes before cracking, and was caught 18 miles from the finish. Yates attacked immediately, and was joined by Nickson.

This move came to nought when the Liverpool-based rider refused to work with Yates, but an identical attack brought the same pair together on the filmal lap. They were still together far the final aprint, despite a late chase by Keith Lambert, another Falcon rider.

ORDINARY SHARES

Why drug world finds it hard to beat the best of British

drugs for the treatment of a wide range of illnesses is one of the great success stories of the twentieth centruy. With the British pharmaceutical industry in the forefront of many of the most significant innovations, the reputation of the United Kingdom industry is very high in international circles.

However, the investor has had some difficulty in participating in this success because of the characted of the industry. One of the largest drug com-panies. Wellcome, is privately owned, with the shares held by a charitable trust. Another major drug concern, the pharmaceutical division of ICL, is only one component of the company classified as belonging to the chemical sector. And is classified under its retail interests being relatively more important than its pharmaceutical side.

The purer pharmaceutical investment opportunities available are classified by the FT All-Share Index under "health and household". The index contains nine stocks. But the sector is dominated by two companies, Glaxo and Beecham. The other members of the group range rom the predominantly household goods" company Reckitt & Colman to Macarthys Pharmaceuticals, a wholesaling

The number of new drug companies joining the sector is likely to be very small. One feature of the pharmaceutical industry is the high cost and enormous risks of research and development. Establishing a product range from scratch is prohibitively expensive. However, the sector may expand as price. new companies emerge in other Beecham has recently had to health related fields, as in weather a difficult period in its

through an offer for sale. Glaxo differs from Beecham in that it is a relatively "pure play, with over 90 per cent of its profits coming from pharmaceuticals, Beecham, by contrast, has a roughly 50-50 split business continues to suffer in between pharmaceuticals and the short term from pricing and consumer products. Over the last four years, the

outstanding performer in the sector has been glaxo. Its share price has risen from 90p (adjusted for the one-for-one scrip issue) to today's price of over £8. This reflects the impact which Glaxo's new ulcer drug. Zantac, has had on group profits. A surge in American interest in the shares (largely thanks to Zantac's success) has also contributed to the stock's rerating, Glaxo's recent performance - underlines a key aspect of such research-based companies, namely, the potent influence a major new product can have on earnings and share

market is extremely rapid. It is not yet clear whether Amer-sham's current research pro-grammes are likely to yield products which will allow the group to maintain its leadership in certain types of diagnostic procedures. Two other stocks, Reckint &

Colman and Smith & Nephew are capitalized at over £500m Both companies have produced excellent results in the last few years, owing to improveed efficiency. Neither spends large amounts on research. They are unlikely, therefore, to have the periodic surges in earnings from new products which characte rize some other stocks in the sector. They do, however, have the merit of broadly based product ranges and very strong brand names.

The pharmaceutical industry highly international, and the British companies face formid-able competition from the United States, Europe and increasingly, Japan, The key to success for all these companies is the impact of new products coming forward from research,

With such a limited choice of investments in the British stock market, there is increasing interest in the analysis of investment opportunity in the pharmaceutical industry glo-

Of the secondary stocks in the sector, only Fisons and Amersham can be said to be with the sector of truly research-based companies. which has performed as well as fisons has the merit of being a Glazo, an observation which "pure" play, with over 60 per underlines the quality - and cent of profits generated by its profitability - of the pharmapharmaceutical business. This, ceutical research conducted by the British industry.

USM REVIEW

Applied Holographics set to project £1.8m image

row of Applied Holographics's Securities Market, At present the shares are traded on United Trust & Credit's over-the-counter market where the price has risen from 25p to about 200p in

greenfield company formed own carry last year to develop a At carry last year to develop a At first they were importers, thamber is valued at £8.5m process for the mass production buying from Europe. They pride where it has a price/earnings of holograms. UTC is expected to place with clients an customers want and their additional I million shares in particular joints are produced, the company at about the 180p often under contract, to a level to raise £1.8m. Dealings are due to start next week. At this level the group is valued at

about £9.28m.
Shares of Applied Holographics were suspended on the over-the-counter market in March at 1900 ahead of the USM listing. The money raised by the placing will be used to linance production and market-

ing of the bolograms. The system used by Applied Holographics is the brainchild of Mr Hamish Shearer and Mr Larry Daniels, a chemist and a designer, who sold their invention to the company for £30,000. The process involves a specially coated plate contain-ing images of the same object recorded from different angles, using laser beams. The result is a three-dimensional picture of the original object that is almost

impossible to copy. The holograms could be produced for security and personnel identification, pretion of counterfeiting, defence and industrial uses in addition to its novelty attraction.

The announcement on Tuesday will be proceeded by a special meeting to approve the amalgamation of the founders'

and ordinary shares into one The issue is certain to attract

criticism from certain quarters after the fluctuation of prices in other greenfield issues like Bio-Isolates and Bio-Mechanics, quoted on the USM.

A company with fixed assets of only £111,000 has a £2.7m price tag after a share placing by the stockbrokers, Schaverien and Company, ahead of USM

Northamher might provide just the opportunity. Mr Cohen's decision to proceed with the placing of 1.3 million shares at 115p, rather than wait until market conditions become more stable, is another positive factor. Dealers expect the shares to open at a healthy premium of between 10p and 15p.

At the placing price Nor-At first they were importers, thamber is valued at £8.5m yield of 1.24 per cent. The company was founded in 1980 by Mr David Phillips, chairman, whose introduction to the world of high-technology came a year earlier when he took charge of a micro-computer. Mr Phillips does not claim to be a technology buff, but he quickly identified a gap in the market place for a supplier of periph-eral equipment specializing in

computer printers. In just a few years Northamber has established itself as a leading wholesaler of com-puter peripheral equipment. Pretax profits have grown from £61,000 in 1981 to £748,000 last year, on sales up from £445,000 to £9.5m, Mr Phillips says: "We have grown far and fast. We do not want it to-stop and this is

where the USM comes in."
It has been estimated that small companies in Britain this year will spend more than £200m on computers and each will need a printer. That is good news for the group which already has a broad spread A surgey by Taylor Nelson Financial, a financial market research company, concludes that the City is split over whether, the USM as achieved the target for which it was

The poll of selected stock-brokers and pension fund managers was carried out on behalf of a company that is considering joining the USM.

About half of those interviewed thought the USM had "come of age" and had been a great success, despite one or two disasters. But the same number of people remained sceptical of the market and said the real test for it would come with the first big bear market when share

prices fall sharply.

There was also a call for greater disclosure and that the minimum level of shares of offer to the public should be raised from the present level of 10 per cent to 25 per cent - the same as for a full listing.

Unfortuantely, the Stock Exchange shows little inclination at present, to review its listing procedures for USM companies to bring them nearer the USM for its new issues, that into line with those companies

suggestion of a comeback.

Montgomerie won the first hole

From Sydney Friskin, Tarrasa

Neston salvaged some prestige from the European club championship by drawing 1-1 yesterday with Frankethal, the German champions, who qualified for the final, having on Saturday beaten Klein Zwitser-land, of the Netherlands, 2-1. Neston finished at the bottom of group B with only one point from three matches and can at best hope for seventh place overall, which will relegate East Grinstead, the English champions, to the B division of this

Many things went wrong for Neston against Eur Spei, of Italy, on Saturday after Royce had put them in the lead in the fourteenth minute. The Italian club, assisted by two

Dutchmen and a German, moved into a higher gear and drew level within five minutes, eventually to

win 2-1.

It was a different story yesterday, with Neston showing more zeal and purpose. Williamson had a superb game in defence, as did David Peters, and there was the will to launch attacks whech surprised and unsettled the Germans, who rested their best player, Peter Trump.

The Germans scored in the twenty-second minute from their fourth short corner, converted by

fourth short corner, converted by Lange. Neston drew level through David Peters from a similar award just before the interval, the shot rising into the net off a defender's stick. Frankenthal held Neston

under considerable pressure in the second half and forced two more short corners, but saves by Ashcroft in goal and Stannard near the line denied the Germans victory. Belfast YMCA, without two key

players, McConnell and Martin, members of the Great Britain Squad, were trounced 6-0 by Dynamo Alma Ata, of the Soviet Union, last year's winners, on Saturday and will play off with Neston today for seventh and eighth places. Dynamo who were better places. Dynamo, who were beaten 1-0 by Toyal Uccle, of Belgium, on Friday, were surprised yesterday by the host club. Atlético Tarrasa, who TENNIS

Cash earns a title and other returns

By a Special Correspondent Pat Cash won the men's singles title at the Beckenham tournament, sponsored by the Kentish Times, when he beat his fellow Australian, Paul McNamee 3-6, 6-2, 6-1

yesterday.

Cash, the runner-up last year, had the extra edge towards the finish when McNamee began to fall away. Afterwards Cash said that he thought McNamee had eased up because of his important match with Brian Godfrey in the Stella Artors Tournament at Queen's Club today. But Cash was delighted at the way

he played. He served 10 aces and his control of the net in the final set gave him complete mastery at the finish. McNamee and Cash practised

McNamee and Cash practical together in the morning and each knows each other's play well. This time, however, the 19-year-old Cash went on to collect the winner's cheque for £1,500.

That was not his only good fortune, Prior to going on to court he was told that the rackets and clothing stolen on Tuesday had been found and that a man has been found and that a man has been found and that a man has been arrested. Cash had received replace-ment rackets and these were used

Bates: first big win

Indoor troubles may cost LTA dear

The Lawn Tennis Association's at least two indoor centres could be in jeopardy following the news that the centres have run into difficult-

The West Midlands Racquet and Tennnis Centre at Telford, which cost £2.25 million and was opened by John McEnroe a year ago, recently went into liquidation but has now been bought. The £3 million Acc Tennis Centre at Covenity, opened three years ago, is now in the hands of the receiver but is still open for business.

Although Telford continues in its role as the LTA's West Midlands regional centre, the association stand to lose a considerable amount of money, as they do at Coventry. No official figures have yet been released, but it is believed their total involvement to both centres is around £200,000 although the LTA expect some of this to be saved.

BOXING

Min-Keun keeps his title

Seoul (AFP) - Oh Min-Keun, of South Korea, the International Boxing Federation featherweight unanimous points win over Kelvin Ramkins, of the United States in a 15-round title bout here yesterday.

The champion, aged 20, floored the challenger in the ninth round and was always in command, catching him with a series of one-twos to the body and face. It was a dull fight with Ramkins, aged 27,

Rugby Correspondent

South Africa. England..

The South Africans have an expression, "Finished and Klaar", which applies most aptly to this international series. The contest, if such it can be described, is over, the argument done; the Springboks expressed themselves with marvellous eloquence on the field to win 2-0 and England's reply came

merely as a stutter, lapsing into

Ellis Park, before a full house of 70,000, only confirmed what we had seen the previous week, this time by four goals, two tries England managed to make and a penalty goal to three something of the match. and a penalty goal to three penalties. The statistics are telling; 413 tries to none, three of them from the powerful Gerber. This constitutes the worst international defeat England have ever suffered, surpassing the 25-point margin sustained against France in 1972 and against Wales in 1905.

Gerber, the 26-year-old centre, has all the gifts an international three-quarter requires: speed, strength and a tentballing brain, In the space of 13 internationals, eight against international board countries, he has scored 12 tries. equalling the achievement of Germishuys, the former wing, England could make nothing of

There was more to South Africa than just Gerber, of course, but how good a team they are may not be known until next year when New Zealand are scheduled to tour. We can judge them only against what is, in all honesty, a most mediocre England team by

international standards. England's forwards stood firmer than they did in the first international at Fort Elizabeth. Brain, in his first international, took two strikes against the head, one admittedly while Sonnekus was doubling-up for

with a head wound requiring eight stitches. But they could not offer support to their back row in the way that Oosthuizen or Visagie did for theirs.

Visagic's lineout work only confirmed how out of sorts he had been in his first international when he was suffering from a stomach malady. It was sad that the running battle at the lineout boiled over in a disgraceful exhibition of punching when Visagie trod on Butcher and the England No 8 completely lost his temper, But was an isolated incident luring a second half in which South Africa, obvious victors after establishing a 22-3 inter-val lead, felt able to relax and

in general terms England's back row did not let themselves down. Winterbottom has matured immensely on this tour and Butcher's courage and commitment have never been in doubt even if his judgement is sometimes at fault. Hall had leave the field just before half-time after receiving a kick on the leg, the same sort of injury he suffered at Port Elizabeth, and Rees came on to become the first Nottingham player to be capped for 10 years. in the short time available to ... him he made a memorable

Behind the scrum Hill and Bailey worked like two Dutch oys at the dyke to plug the holes. But they could not erase the impression of some woeful tackling in midfield. Mistakes at retain pocession.

The only time the South had only threadbare support, and a drive by Rees, Brain and Dintrans, the captain, in the tight Butcher which ended with a and Joinel in the loose led a much knock-on by an England for-Seriontein, whose tactical kick-ing in this match was as good as numerous penalties and some ill-

Britain pay a heavy price for getting involved in a brawl

Great Britain.

Sydney, (AFP) - Great Britain's demoralizing defeat in the first international here on Saturday could have cost them the services of two players for the second international in Brisbane on June 26. Definitely out for the next three 26. Definitely out for the next three matches is the replacement forward, David Hobbs, who was suspended and fined \$900 after being sent off in the closing stages. The British half-back, Neil Holding had previously been taken to hospital with suspected damage to a cartilage. Hobbs was sent off by the referce Ray Shrimaton, in the finel

Ray Shrimpton in the final moments following a clash with the Australian hooker Conescu, and was charged with "foul play involving the use of an elbow to the head". Conescu was concussed and missing a tooth, but he will be available for

Holding, the dashing St Heleus half-back, was in agony after a twisting tackle by the Australian second row forward, Pearce in the nineteenth minute. The Great Britain coach, Frank Myler said he wight; sand for a coalcament. might send for a replacement, although he would not be seeking a third half-back to join Gregory and

The tourists have already lost Duane, the Warrington centre, with knee trouble after the opening game in Darwin last month. "The injury to Holding disrupted us a bit," Myler said. "He looked dangerous while he was on the field and he got the ball out to the centres well." The Australian coach Frank Stanton surveyed a dressingroom of hancred and bruised players and said: "That was extremely tough, certainly the toughest Test we've faced since 1978."

Great Britain, out to end a run of seven consecutive international defeats by Australia since November 1978, dramatically narrowed the yawning gap between the

Iwo sides with a sharp improvement in defence, fitness and commitment. and Stanton stressed that the series was far from over. "They are going to get better and better," he said, "They're young and

we obviously took advantage of that

To put pressure on them and it paid off, but they should not be written off." OTI.

Over 70 mpg. Over 90 mph. Doesn't that sound like the engine you've been waiting for?

You're in for a surprise. It's Ford's new 1.6 litre Light Diesel, a thoroughly

civilised little engine. What's it like to drive?

Far from being slow, noisy and smokey, as you might expect a diesel to be, this latest example of Ford's advanced technology is both quick,

quiet and clean. Even if you've never thought of buying a diesel before, you might be tempted by this one. You see, it's not a converted commercial diesel. It was specially designed to power our small front wheel drive cars and their van derivatives. And it's built on one of the most advanced production lines in

The new Ford 1-6 Light Diesel Quick, quiet and clean. Diesel engines are very

simple, very robust and very cheap to run. Instead of carburettors they have fuel injection. And there is no distributor and no spark plugs. The heat generated by a very high compression ratio ignites the fuel. This new Ford engine is the most refined small car

the world, a £140 million investment in Dagenham.

The result is quite remarkable economy - 70 mpg* is exceptional

even for a diesel. And so is over 50 mpg* round town.

But this is combined with a surprising turn of speed. It can cheerfully cruise in the eighties.

And it packs bags of punch for acceleration through the gears. Like all diesels, it's practically indestructible. But unlike most, noise and vibration have been engineered

As long as it's properly adjusted it makes little more smoke than a a petrol engine to start up in the

petrol engine. And it's just as eager as morning. Special glow

It also has the same service intervals as our petrol engines. All Ford dealers know how to look

And most garages now serve diesel on their forecourts. It usually costs around £1.70 a gallon.

As well as the Escort above, our new diesel is now available in Ford Fiestas and

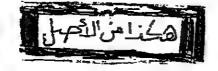

And, just in case you're wondering, they're just as well equipped as the equivalent petrol models.

morning. Special glow plugs make sure of that. Ford cares about quality.

Why not come and have a drive in one? We think you'll agree, they've been worth waiting for.

Government fuel economy figures – mpg (litres/100 km). Escort L6 diesel saloon: constant 56 mph (90 kmh) 70.6 (4.0), constant 75 mph (120 kmh) 48.7 (5.8), urban cycle 51.4 (5.5).

CRICKET: SELECTORS NAME DOWNTON AS WICKETKEEPER

Whitaker, of Leicestershire, on his way to 106, despatches Thomas, of Surrey, for four (Photograph: Ian Stewart).

England's conservative choice

By John Woodcock, Cricket Correspondent

followed their instincts and chosen conservatively for the Richards, French and Russell, chosen conservatively for the first Test match against West Indies, sponsored by Cornhill, which starts at Edgbaston on Thursday, only with the wicket-keeper have they not played it down the middle. Bob Taylor has been passed over, his place going to Paul Downton, who played the last of his four Test matches at Trent Bridge in matches at Trent Bridge in

Taylor's omission does not mean that he has lost touch. It simply is that any extra runs which Downton might make will be very useful, and Downton's wicketkeeping, if uot as good as Taylor's, is superior to Bairstow's. Downton has much to play for. Taylor was 36 by the time he got a fairly regular place in the England side, yet he has played in 57 Test matches. Downton is now 27 and has many years ahead of him

. Taylor's craftsmanship when playing for England has been a constant source of delight, often when there has been not much cise to boast about. Though 42 (he is 43 next month) he is still probably the best wicketkeeper in the world. He is a model professional and will be much

awaiting their chance. Besides Taylor, the unluckiest omission from among

R G D Willis (Warwickshire, 35, 87)

last winter, is Smith, the opening batsman. His average from five Test matches of 39. was inferior only to Gower's. It is the difficulty he has in coping with the lifting ball, through lack of inches more than for want of courage, that may have decided the selectors against him. As left handers, Fowler and Lloyd also have slightly more room in which to manocuvre against the fast missed. Downton has a hard act bowling, and they did well

The England selectors have to follow, and in the wings are together in the last two one-day Cook deserved to be preferred. internationals. Fowler, to his purely as a bowler, to Patel, credit, keeps bouncing back, though the latter's batting.

By the time Gatting played would have helped. There is By the time Gatting played talk of Randall going in t No 3, a place occupied first by Gatting and then Gower in the one-day his spectacular innings against Somerset on Saturday, the England team had been chosen.

internationals. Even had it not, I doubt whether his 258 would have Next in line to open Engsaved him. He looked in such land's innings could be Moxon. who is making a good ipression in his first full season in the an awful technical tangle against the West Indian fast bowlers in the one-day international at Yorkshire side, Ellison and Asiett are in the running for a Trent Bridge that the selectors first cap, an Bailey's innings of had little option, when they met, but to give him a rest. He will be back, I am sure, perhaps 95 for Nothamptonshire against the West Indians on Saturday will not have passed unnoticed. Several other of the young ones are being watched and could be even on Thursday if the injury Gower received at the Oval on Saturday should keep him out. Cowans and Marks, who also called on before the series ends.

A word, finally, about Tavare, who for the moment played in England's last Test match (in Lahore in March) are now without a place. If that seems hard on Marks, whose last three Test innings in Pakistan were 83, 74 and 55, has fallen away. In 18 of his last 20 Test matches he has been required to go in first though he would always have rather not. It fell to him to hold the fort in the this summer's series will feature absence of Gooch and Boycon. In doing so he took a lot of flack a very different type of game. Cowans may expect to be back as soon as a faster pitch than Edghaston's is signted. On and in the end it got at him. The willingness and determination he always showed used to be reflected in Willis' keenness to have him in his Test side. At his Thursday the pitch may even be slow and bare enough for two spinners to be chosen, a contingency allowed for by the inclusion in yesterday's 12 of best. Tavaré would have fought his corner against West Indies both Miller and Cook. With 35 this summer as dourly as wickets in his six Test matches,

Surrey win with only a single ball to spare

SURREY gained their third John Player League victory of the season with just one ball to spare against LEICESTERSHIRE. Chasing 212 LEICESTERSHIRE, Chasing 212 for three, Surrey seeded 72 runs from the last 10 overs, But Richards and Themps. true the last 10 overs. Sur Richards and Thomas accord 40 of these in 23 deliverles, and Payne made the whating his off Clift from the penultimate delivery.

The League champions, VORK-SHIRE cruised to a comfortable six-

wicket victory over KENT at Canterbury with Moxon (77) leading them to their target with two orers to spare,

Graeme Fowler celebrated his selection for the Test squad by hitting his best ever John Player League score at Old Trafford yesterday. Fowler scored 75, sharing in an opening stand of 142 with Ornered, as LANCASHIRE stormed to an eight wicket win over SUSSEX, who had struggled to 157 for eight.

for eight.

Bob Willis came in for severe Bob Willis came in for severe punishment as ESSEX achieved victory over WARWICKSHIRE at Illord by 42 runs. His eight overs cost 64 runs, 23 of those arriving in one over as Pringle, twice, and Fletcher hit sixes during a fifth wichter partnership of 68. Gooch made 74, including nine fours and a six.

Gatting runs away with the honours

By Ive Tennant

On Saturday Mike Gatting made 258 for Middlesex against Somerset; yesterday he was left out of England's squad. The gulf between county and Test cricket has rarely been better emphasized than by his

Everything else in the country championship on Saturday pales by comparison, even Kallicharran's sixth first-class hundred of the season. It gave Warwickshire a healthy total against Essex, the more so as the pitch at liford, once a batsman's haven, is unlikely to last. Mozon, already thought of as a Test prospect, reached a century for Yorkshire against Kent. Romaines

Yorkshire against Kent. Romaines belped Gloucestershire to a substantial score in opposition to Derby-shire. Jesty, whom the press and England's selectors seem to have forgotten, did the same for Hampshire off Wortestershire.

These are not the happiest of times for Surrey. Leicestershire, the championship leaders, bowled them out for 115 with Agoew, who impressed against West Indies at Arunded in the week, capturing five for 44.

TENNIS: CZECHOSLOVAKS WIN BOTH FRENCH SINGLES TITLES

Lendl solves McEnroe puzzle in a great final of three phases

From Rex Bellamy, Tennis Correspondent, Paris

Ivan Lendl beat John McEn-roe, 3-6, 2-6, 6-4, 7-5, 7-5 in four hours and seven minutes in yesterday's men's singles final McEnroe's game, as if suddenly

take charge, but it seemed that neither would ever wilt.

The 1984 French champion-ships will be a hard act to at Roland Garros, It eventually became a great sporting contest, with almost every point chis-elled out of stone. The result meant that McEnroe had been beaten for the first time this year, that Lendl had at last won a grand slam singles title after finishing runner-up four times. be the stronger man. As for the and that both the French singles champions were born in Czechoslovakia.

The men's final fell into three phases. During the first McEnroe served so well that in 10 service games he conceeded only 10 points. He did everything with such confident authority, such dextrous precision that Lendl began to look bemused. He seemed to have

jigsaw puzzle.

In the fourth set McEnroe scales were obviously quivering. McEnroe was looking weary and talking to himself. It seemed that Lendl might now passionate crowd, they were no longer mere speciators. They were at one with the players in grasping every ray of hope and feeling the shock of every

France make Hidalgo angry

Paris (Reuter) - Michel Hidalgo, the French coach, has criticized his team for an inept performance on their last friendly before the European Championship finals start tomorrow. Hidalgo, whose team are favourites, said he was not satisfied with the side's 3 - 0 victory over a French military selection yesterday.

"The attacks were too slow, the game was too confined and too central and there were too few risks taken in shooting," he said. "They

football."

As West Germany, who are defending the European title, could only beat the same military team by an identical score on Thursday, Hidalgo feels his team should no longer be considered favourites.

Enzo Scifo, Anderlecht's Italian-born midfield player has become an official Belgian citizen, ending doubts about his dispility to play for Belgium in the European Chamionship finals.

Scifo, aged 18, applied for Belgian citizenship papers this weekend.

Budapest (Reuter) – Four Hungarian first division football teams have been punished by the national football federation after being found guilty of match fixing, the official news agency reported yesterday. Honved, the Budapest team who are leading the first division, will have four points deducted as a result of their 6-6 draw with Volan, also of four points deducted as a result of their 6-6 draw with Volan, also of

relegation.
Along with Volan, Diosgyoer
Miskolc and VSSC Nyirecyhaza.
who were both in the bottom half of the table, were relegated to the second division after a fixed match in which Diosgyoer lost 7-2 to Nyiregyhaza. All three relegated teams will start next season with a four-point deficit.

Sudapest, who were on the brink of

was dominat throughout, excelled for England Schoolboys in the under 15 international against The Netherlands at Wembley (George Chesterton writes). Crosses by Tomlinson supplied two of the three goals scored by Mark Burke in England's 4-1 win. Bell scored England's other goal and Alma replied for the Netherlands

YACHTING

Mr Daniel Wildenstein scat me 30 home-breds every year. They are good horses and I like training them. He had some reason for feeling angry with Piggott about All Along last year. And like him, he's a strong and determined man."

Explaining the background to this dramatic rift, the four-times champion trainer continued: "It all became very difficult to handle.

With Tony Ives having to appear

as a witness in a court case today. Lester Piggott can take the

opportunity to make ground on the new leader in the jockeys' cham-

pionship by riding two winners, Athenia (4.00) and Jungle Romeo

(4.30), at Leicester.
Athenia (nap) looked a useful filly

only race last season Doncaster. She

confirmed this impression when running third to Caire Bridge and

Celtic Assembly in a good-class race at Kempton Park on her reappear-

nace, but then disappointed when favourite for the race won by Sajeda

In retrospect, however that failure could be excused by the act that shw may have not been suited by the soft

ground ans also that the distance of

at Newmarket earlier this month.

horse must have the handiness to hold a good early position, the speed to quicken clear of his rivals when asked and the stamina and courage to hold onto his lead. Circus Plume possesses all these qualities and Piggott rode a copybook race in maximising ber chance of using

your yard. It doesn't work, And as Piggott wants to go on riding for another season at least, I told him that he'd have more freedom of Oaks result in full 3.00 GOLD SEAL OAKS (Group 1) (3-y-o: FRee: £122.040: 1m 4f)

TOTE: Win: E4.80, Piscase E2.10, E17.40, E2.10, DF: E803.30, CSF: E168.43, 2m, 38.97 sec. Out Of Shot Ph 3nd disq, led last.

choice in the classics and other big cacte if we parted".

Exactly why Piggott has ridden 27 classic winners about 20 years earlier than his venerable predecessor Buckle was forcibly shown by the 48-year-old maestro's determined handling and Settermined. mined handling on Saturday. Piggott is the ultimate professional.

John Dunlop has been one of our

top trainers for some years, and Circus Plume added the Oaks to the laurels that the 43-year-old Ulsterman has already won in the Derby and 1,000 guiness with Shirley Heights and Quick As Lightning. The trainer has achieved his success by using the best rider available at that time and not by employing a retained jockey.

Out Of Shot pured eight horses in the last furiong to take third place, but was found to have interfered with the favourite, Optimistic Lass. She was disqualified and placed last, Eddery was found guilty of careless riding and this being his second offence of a similar nature, this season, was banned for a 10-day period. The sentence is to run from June 18 to sentence is to run from June 18 to

This will be a week that Eddery will want to forget. The ban followed hard on the heels on the unjustified criticism of his riding of El Gran Schor in the Derby and his public slating by Russ Hobson for his handling of Baton Boy on Thursday.

to Tony Ives, who moved to the top of the jockeys' table with 39 winners

Northern Trick dazzles in Diane

Prix de Diane Hermès (French Oaks) at Chantilly when Yees Saint-Martin was dislodged from Incredible before the start of the opening selling race. The 15-times French champion jockey fell on his back and was taken off to the jockey's hospital at Chamilly where it was later sanounced that he had fractured a vertebra in his back.

for such of the time will have to rest to his back.

His place in the Diane on the favourite, Grise Mine, was taken by the Australian-born Gary Moore and the pair finally had absolutely no chance against Northern Trick, who dominated her rivals in the French classic before whating by an ever-locressing five lengths. Grise Mine finished record, three lengths had of Punan Balls, and then came Daily Busy, Princess d'Elide and Glowing With Pride, the English challenger.

For Stavyos Niarchos it was a great moment. After the cace he said: "This was far River-Ledy." This filly was tragically destroyed in the Diane two years ago when challenging for the lead in the hands of Lester Piggott. The filly byoke her thigh 300 yards from the post.

It was also an emotional moment for Francois Boutin, who had not had an easy season until now. He declared: "I thought at the beginning of the year I had three-year-olds who would win many classics, My lack seemed to pun out, but this victory has been a terrific boost and my first ever in the Diane."

Northern Trick will now go for the King George VI and Oneen

Northern Trick will ac

Northern Trick will now go for the King George VI and Queen Elizabeth Diamond Scalen at Ascot next mouth. Yesterday's victory also concludes a remarkable week for the veteran stallion Northern Duncer, who not only sired Northern Trick but also Secreto and El Gran Schor, the whomas and remarkable.

but also Secreto and El Gran Selor, the whose and runner-up is last Wednesday's Epsom Derby.

Cash Asmusson said of Northern Frick: "I have ridden some great fillies - April Run, Mairzy Doates and Waya - but this could be the best of them all. Don't forget it was only her third race.

Gene Moore had no excuss for

only her third race.

Gary Moore had no excuses for Griso Mine, who had no response when challenged by Notthern Trick. Pat Eddery was always well placed on Glowing With Pride, who failed to accelerate in the final stages, and Wille Carson was a little disappointed with Satinetin the other British runner, who Major Dick Hera thought needed firm ground.

The Prix du Lys went to Aris Noir, who became Andre Fahre's twelfth group winner of the season. Aris Noir could line up for the Joe McGrath Irish Sweeps Derby at the Curragh on June 30.

PREX DE DIANE HERMES (GROUP 1) (3-y-cs brose 256,007: 1or 21 110yc) Grise Mine GR Fby Crystel Pail (Baron G De Rothechild) 9-2

Pempa Balle CH & by Armos - Ke Daubhi) 9-2

Parl-Mutuel: Win 5.60: Places: 1.50, 1.29, 2.80. DF 3.70, 2m 11.6sec.

Swale came back to his best with an all-the-way victory in the richest ever Belmont Stakes at Belmont Park on Saturday. The Kentucky Derby winner was forgiven his poor seventh behind Gate Dancer in the seventh behind Gate Dancer in the Preakness Stakes and started a hot favourite at 6-4. He was well to command in the final two farlones and galloped home four lengths in front of Pine Circle.

Paul Cook, who replaced Greville Starkey on two rides at Cologne yesterday, received a two-day suspension after winning, but being disqualified on the first of them.

How Piggott refused to buckle

things. They put words into my mouth and I didn't like it. Lester and I were talking things over quietly and trying to come to an agreement. The whole situation Lester Piggott, who became one of the first hard men of sport when splitting with Sir Noel Murless in 1966, took another step along his single-minded and eccentric road to immortal fame when equalling Frank Buckle's record of 27 classic "You can't have a stable jockey who can only ride half the horses in rictories on Circus Plume in the

victories on Circus Plume in the Oaks at Epsom on Saturday.

1966 was the year in which England won the World Cup for the first time. Professional football was already dominated by the inflated transfer fee, the personality cult and the professional foul. In the world of tennis, Roy Emerson and Rod Laver had also pointed the way to a player's maximum capitalisation of player's maximum capitalisation of his assets by amassing fortunes. But at that time, Piggott's total disregard of accepted standards of loyalty, shown by breaking a contract in the middle of the season, caused a flutter in racing dovecotes, to say

the least.

Now, 18 years later, the boot is on the other foot. Henry Cecil, Murless's son-in-law and successor at Warren Pace, became the hard-liner among trainers when, talking about his own break with Piggott, he said: "We've all got our own pressures and interest to consider, Mr Daniel Wildenstein scnt me 30 home-breds every year. They are

above sil, a percentage jockey.

To win a Derby or an Oaks, a

ATHLETICS: BRITONS CLAIM PLACES AS HINGSEN SOUNDS WARNING

Local hero has no answer to Martin

By Pat Butcher

Earnonn Martin circuited a chauvinistic finale for the Gateshead crowd yesterday when he outsprinted the local hero, Mike McLeod, to win the 5,000 metres the local superior the Coursele stirt. the last event of the Olympic trial, sponsored by HPC Trust.

Martin's personal catharsis was a last lap of 55.48 sec. which turned what had been a reasonably sedate early pace into the astest time in the world this year, 13 minutes 23.33 seconds. That made Martin the 50th Briton to be selected for the Olympic team so far.

The long road to Los Angeles sunshine started for Ade Male in the cold confines of Cosford last winter. country enjoyed bright sunshine, but Mafe did not cae. He outleaned Buster Watson to win the 200 metres in a personal best of 20.77 seconds. At 17 years old, Mafe becomes the youngest man in the British team, joining Allan Wells, at

Sue Hearnshaw kept her best long jump until last, but it was another world class leap of 6.71 metres. Christina Boxer the Commonwealth 1500 metres championship, produced the last last of 60 Seat to him. duced a last lap of 60.8 sec to Join her Aldershot colleague Zola Budd at the head of the British ranking list winning the 1500 metres, while in Kathy Cook won Olympic selection to go with her 200 metres place.

Roger Hackney proved the trongest of the three steeplchase, winning in 8 minutes 20.16 seconds, winning in 8 minutes 20.16 seconds, the one of the fastest times in the world this year. Ken Baker of Cannock Chase set a suicidal early pace, and he was almost walking hen he was passed by Paul Davies-Hale, his Cannoke colleague, with two laps to go, Davies-Hale was the Livourite at that point but Hackney cased away in the last 200 metrs, leaving Daves-Hale and Graham Fell, the UK record-holder and fifth

year, to fight it out for the last palce in the team at the AAA championships in two weeks' time.

Peter Elliot's late charge towards doubling up in the Olympics by going for the spare 1500 metres pice was maintained with a win in the Emsley Carr Mile in three minutes, 55.71 seconds. Elliott won his 800 metres selection last Wednesday, and after his opponents had set an even pace of a fraction over three minutes for the three-quarter mile.

record from Hingsen Jurgen Hingsen of West Germany has tempted fate by breaking his decathlon world record seven weeks before the Olympics (Pat Butcher writes). For the last two years Hingsen has set a world record in the event only to be beated by Britain's Daley Thompson in a major championably a few weeks

in the world championships last year, to fight it out for the last palce

and sprinted away to an easy victory to give the prospect of an entralling confrontation with Schastian Coe the AAA 1500 metres at Crystal Palace on June 24.

Record jump

Eberstadt, West Germany (Reuter) - Zhu Jianhua, of China, broke his won wourld high jump record by clearing 2.39 metres in an international high jump competition

DAVELIN: 1, D Ottiny (Telford), 85.86 metres; 2. P Yetes (Blackheath), 81.24; 3, M Humphries (Haringey), 77.96.

HAMMER: 1, M Grvan (Wolverhampion) 74,34 metres: 2, M Milehem (Haringey), 73,92; 3, D Smith (Huth, 70,52 20the: 1,5 Whitteler (Glasgow), 23,20sec; 2, J Baptista (Wolverhampton), 23,25; 3, S Jacobs (Reading), 23,27

Hingsen set a world record in last year's West German championships in June, but in August Thompson again beat him for the first world

championships title. Bad weather conditions in Helsinki precluded any

chance of a world best in his national championship in Man-nheim. His record stands at 8,797 points, 19 points more than last

Transatlantic title is not for 33 Export

From Barry Pickthali Peter Phillips, the retired police-man from Exeter, sailing the 60ft trimaran Travercreasi Seaway, yesterday moved into the lead of the Observer/Europe I single-handed transatlantic race when disaster struck French hopes for the third

Phillips has averaged 8.4 knots over the first balf of this 3,00 mile crossing, which, if sustained over the remainder of the voyage, will be fast enough to break Phil Wed's 17-day record. He took over the lead when Gilles Gabinet was forced to the balk after his teleman 2.3 later.

Thompson has won every decathlos encounter with Hingsen but his
role as the West German's nemesis
was not prominent in Athens at the
senior European championships in
1981. Hingsen had set a world
record of 8,720 points in the West
German championships six weeks
before, but Thompson broke that
record with 8,743 as he beat
Hingsen comprehensively for the
title. turn back after his trimaran, 33 Export, had sprung a leak in one of her hulls. Second place is now held

● The international boardsailing regatts at which Britain's windgilder representative for the Olympic Games will be selected started disappointingly yesterday at Torquay (John Nicholls writes). It is proved impossible to set an accurate course in the light, shifting breeza and after three and a half bours of waiting at sea, racing was postponed until another day.

MOTOR RACING

Dumfries back in the lead

By Jeremy Shaw

A finely judged victory at Silverstone yesterday afternoon moved Johanny Dumfries back into the lead of the European Formula Three championship, his Team
BP/Dave Price Rachy Ralt-Volkswagen crossing the line less than
one second ahead of the similar car

Even a rapid engine change, completed less than half an hour before the start of the Acorn Computer European Trophy race, failed to distract the Formula Three man of the moment, who had admitted to being "rather worried" at the end of the warm-up session

on the morning of the race,

Stewards anger quiet American

RACING

By Michael Seely

The local stewards were certainly that British racing is the best in the hitting out right, left and centre at Epsom on Saturday. No sconer had they dealt with Pat Eddery than United States title in 1973, and has were inquiring into Darell McHargue's riding of Molara in the Alberta Rose Stakes on Friday. They found McHargue guilty of injudicious riding and fined him £100. "It's a whole crock of bull," the former champion American jockey said. "I'm going to see my solicitor about taking some action."

The camera patrol film showed

"I'm going to see my solicitor about taking some action."

The camera patrol film showed that McHargue had settled the filly down in last place, racing on the bridle. Just over a quarter of a mile from home, he asked Molara to get down to business, but she showed signs of inexperience and did not respond. She passed two beaten horses in the last furlong.

"She ran very green, and didn't handle the course." McHargue was also interviewed by the stewards after finishing fourth on Wise Crown behind Tamertown. Lad in the Whitehaw't Stakes and was deemed to have caused interference. He was informed that his style "seemed unsuited to the course". Reading between the lines it seems that the stewards are trying to make McHargue conform to down now and certainly don't seems that the stewards are trying to make McHargue conform to down now and certainly don't seems that the stewards are trying to make McHargue conform to down now and certainly don't seems that the stewards are trying to make McHargue conform to down now and certainly don't seems that the stewards are trying to make McHargue conform to down now and certainly don't seems that the stewards are trying to make McHargue conform to down to business living a bit was deemed to have caused interference. He was informed that his style "seemed unsuited to the course".

The Times guide to career choice

HORIZONS I

Mounting an attack on the job market

may like to consider an alternative attitude to work and attempt something completely different. Stop to think about those people who seem to have more work on hand than they can cope with. Who are they and can you join them?

While most of us today cannot afford many new goods, such as furniture, cars, good clothes and expensive equipment, we must maintain our possessions in reasonable order, Therefore, when you have the skills to provide personal services. such as redecorations, dry cleaning, shoe and clothing repairs, soft furnishings and plumbing, you can

earn a fair living.

: If the idea of approaching employment by meeting known needs appeals to you, see how you can angle your abilities/knowledge/training/ career choice to an attack on the job market

Routine tasks

Further examples of work for the independent-minded may be helpful; find others for yourself in line with your inclinations. Many "personal services" call for practical or technical services can for practical or technical skills, such as car upkeep and electrical repairs — your local electrician's tiny shop will be crammed with radios, TV sets, vacuum cleaners and occasionally model railway engines, all needing his attention variety is one of the pleasures of the small man's work. small man's work.

Arts and crafts training is a useful

Mariorie Hills devises an alternative attitude to finding work

start: a course on silver-smithing would enable you to assist a jewelry expert. He too really wants to create beautiful rings and necklaces but his bread and butter line is in minor repairs, which subsidize original work, if you hope to produce unusual knitwear, start by working in a reputable store. Obviously, you have to do routine tasks well: the next step is to interest the buyer. Many fashion designers begin like this. You will absorb knowledge about costs, mark-up, display and customer relations which will be invaluable when you take the risk of starting on your own;

to make your reputation leisure industries offer possibilities for enthusiasts. For instance, there is tremendous interest in sailing and canal and river boating; boatyards have a range of jobs and casual labour. Again, if your hobby is woodwork, remember that the good carpenter is rarely out of business. Make favourite occupations work for

the store may well commission samples before then and thus help you

You will usually have to gain experience by working for a fellow craftsman or expert before deciding to go independent. Among workshops throughout the country, generally in

converted warehouses and mainly for the self-employed. Omnibus in London lets flexible office or workshop space at a nominal rent; tenants include computer firms, potters and dressmakers - both traditional and punk. Omnibus accepts young tenants and the atmosphere is mutually

Outline a case

When you are ready to outline a case for starting your own business and can prove marketing ability as well as book-keeping experience, see your bank manager. He may terrify you with questions about cash-flow, forecasts, records analysis and accounts (let alone asking the crunch point about capital and backing). While working for someone else, you should have familiarized yourself with these concepts.

The bank may help you via the government-assisted scheme. Loan Guarantees for Small Firms. Before reaching this stage, study the information regularly available in the press and on radio and television for the self-employed and the many arrangements made to encourage individual enterprise such as the Manpower Services Commission Enterprise Allowance Scheme. For some young people, these suggestions may come into the too-difficult category. There is no need to give up. If you have talents, plenty of hope and intend to work hard, make your own oppor-

Why employers still want graduates

Demand for graduates by employers remains at a high level. A recent report by the Association of Graduate Careers Advisory Services (AGCAS) revealed that increasing numbers of recruiters are keen to have graduates on their staff. However, because of economic uncertainty and the difficulties of forecasting, many firms now wait until the last moment before want until the fact moment octore actively recruiting. The consequence is that a lot of highly employable graduates may not have received a firm job offer before going down.

For some this may be alarming. Parents too may be anxious at the property for their contents.

uncertain future facing their sons and daughters now that they have left the support system provided by their

The welcome news, therefore, from careers advisory services is that exactly the same facilities are available to them now as when they were students. Just because they have some letters after their names it doesn't mean that they are cut off from all the advice, information, and details of vacancies which were provided to them as undergraduates.

Most graduates of course will pack their bags and return home at the end of term and this usually means moving away from the area of their college. Fortunately, under the so-called mutual-aid system, the various graduate career advisory services who are AGCAS members have agreed to take under their wing each others former. This too will normally be given to students. In other words a Mancunian outside graduates and in some cases it who attended Bristol University could make use of the Manchester University careers service once be or she got

For those students who have decided not to start serious job-seek-ing until after graduation this is a adous boon, buecause it means that they can get the benefit of everything from the milk round ouwards. For some careers advisers, however, taking on responsibility for other institutions' graduates as well as dealing with their own students has led to a major increase in pressure. The London University careers

advisory service, for example, is certainly feeling the strain.

As David Paffley, the associate director, commented: "In London we've got not just the graduates whose mes are here but those who have been drawn to the Capital hoping for better opportunities. As a result the number of people we see has gone up considerably and it may mean that some people have to wait a few weeks before getting an interview."

None the less, as Mr Paffley insists, all graduates remain welcome even if they are asked to have some patience whilst waiting for attention. Some graduates may not necessarily want careers advice as such but

simply access to the information in the careers advisory service's library.

outside graduates and in some cases it may be possible to attend the talks and group sessions which are provided by way of careers education

Details of job opportunities for graduates are mailed out regularly in Current Vacancies by the central services unit of AGCAS to everyone on their computer. This service is available to all graduates for as long as they need it although the vacancies, of course, are mostly restricted to first appointments. A lot of individual colleges also distribute their own vacancy lists of vacancies in their immediate area.

important facilities of all are the summer recruitment fairs which are organized on a regional basis. Increasing numbers of employers use these as a way of filling their forthcoming vacancies, because by now they have a clear idea of their requirements. Find out from your career advisory service about the fair in your area.

too long before starting to job hunt. Go along to a recruitment fair; and Help is at hand - make use of it.

Edward Fennell

WOODBRIDGE SCHOOL Applications are invited for the post of

HEAD OF WOODBRIDGE SCHOOL Co-educational, day and boarding school of 630 pupils. The present Head, Mr A. F. Vyvyn-Robinson, who is a member of Headmasters' Conference, will refinquish his appointment on 31st August, 1985.

Applications required by 8th July, 1984. It is hoped that an appointment will be made in October 1984. Further details and an application form obtainable from the Bursar, Woodbridge School, Woodbridge, Suffolk, IP12 4JH.

 Instead of beginning with newsreel footage of the Northern Ireland troubles of the present day, as it could so easily have done, and legitimately, Edward Bennett's film ASCENDANCY (Channel 4, 10.00pm), set in Belfast in 1920, is prefaced by archive film of battle action in the First World War. Mr Bennett has justified the decision by quoting Marx's aphorism that the tradition of all the dead generations weighs like a nightmare on the brains of the living. The film's central character, the Belfast shippard owner's daughter (Julie Controlly) of the first for her hardest saspyard owner's cauginar (June Covington) grieving for her brother who has been killed in the war, has been psychologically crippled by her grief. The nightmaire is to deepen, and her hysterical paralysis is to worsen, for these are the rehearsal days for ireland's civil war. Mr

Bennett's screenplay, co-written with Nigel Gearing, makes the

Sikhs and swords in a peaceful London protest

'Down with India' is the chant leaving Hyde Park. Photograph: Jeremy Nicholl

By Stewart Tendler

More than 25,000 Sikhs marched angrily past a heavily protected India House in central London yesterday to protest at the attack on their holy centre in Amritsar and the death of Sant Jarnail Singh Bhindranwale.

Police had expected a smaller turn-out but they took few chances after an attack on India House last week. The island on which the building stands between the Aldwych and the Strand was sealed off

with lines of police horses, vans and officers in riot equipment in the background.

As the march from Hyde Park to Smithfield ended, Scotland Yard reported four arrests for minor public order offences but no other trouble in a police operation involving several thousand officers. An effigy of Mrs Indira Gandi, the Indian Prime Minister, was burnt near the Aldwych.

The marchers too over an hour to pass the police line and at one stage confused Bush

House, home of the BBC's World Service, with the Indian High Commissioner's building dden behind the police. With police agreement, a

number of the demonstrators carried ornamental swords or daggers which have religious significance for Sikhs. Chanting "Down with Indira" the marchers, from all over Britain, carried pictures of Sant Bhind-ranwale and small black flags. The organizers had planned to leave a petition at the High Commission but India House would not accept it.

Frank Johnson at the economic summit

Naming names for the Italian job

The London Economic Summit ended on Saturday with broad agreement on everything, except on the issue of who is the Italian Prime

The Italian delegation, and the man himself, consistently the man himself, consistently advocated a policy of the Italian Prime Minister being Signor Bettino Craxi. But a British document handed to the press and entitled "briefings — Saturday, June 9 contained the passage: "16.30 hrs. latian briefing, President of the Council of Ministers, Benito Craxi. Yet the document also referred to "Chancelment also refered to "Chancel-lor Dr Kohl," omitting the

The British drafters were perhaps confusing the Italian Prime Minister with a much less benign head of Govern-ment whose last public appearance was upside down in

April, 1945. When I triumphantly poin when I triumpnanty pointed out the first name which Signor Craxi had been assigned in "briefings - Saturday, June 9," I was informed that The Times had recently referred to him as Signor Division of the Parting Par Bruno Craxi, Bettino, Benito, Bruno! At the time of writing the issue could go any way.
When confronted with dis-

agreements of that kind, the Summitteers usually agree to set up a working party and tell it to report some other time or to next year's summit. This is impractical on the issue of the Italian Prime Minister's first name because under the exceptionally democratic Italian constitution, the entire Italian population of voting age takes turns at being Prime Minister, and it will be someone else's turn by the time of next year's summit.

Regular readers may sus-pect that I am morbidly pect that I am morbidy interested in, or somehow obsessed by, the office of Italian Prime Minister (see this space, last Saturday, and all other reports by present writer on annual economic summits). This is correct.

Among the seven most important rulers of the world gathered together on these occasions it is always the cautious, worldly-wise, melan-choly Italian who knows best of all the substantial, transient nature of earthly power. Because of his own especial

transience. he is the least important of the seven, yet he comes from the greatest civilization among all the seven, from the country out of

tions of all the others derive their greatest achievements. So, in reality, this Signor Bernardo Craxi is the most influential of them all. It was an honour to have him among us, and we look forward to

meeting next year's. Mr Reagan, like Signor Craxi and myself, was also preoccupied throughout the weekend with the transient nature of earthly power. He wants four more years in transit. The first rule of summits, of which Mrs Thatcher was the beneficiary last year, is that no one does anything to make it more difficult for the non-Italians to get re-elected, the Italian of

course, being assumed to be incapable of the feat.

In a year when the US President is the one qualifying under this rule, any disagree-ment on any subject is held to make more difficult his reelection. Mr Reagan, therefore, had an extremely enjoyable and uncontroversial weekend. That left the hostess, Mrs Thatcher, and the others with the problem of justifying the occasion.

So, on the first day, Mrs. Thatcher arrived among us in the press centre and read a Declaration on Democratic Values. That favoured peace, free elections, free speech and human rights.

On Saturday afternoon the Summitteers arrived at Guildhall for the reading by Mrs.
Thatcher of the final communique. The Lord Mayor
and other civic dignatories waited at the door in fur costs with huge frilly napkins tucked into their necks. American security men no doubt eyed them suspiciously.

On guard inside were the halberdiers out of And When Did You Last See Your Father? with their pikes, breast plates and pointed helmers." At the British delegation's

press conference afterwards Mrs Thatcher disarmingly confessed that she had ombted a bit of the communique, because when you read it, it seems so long. Was there a hint there that she too realizes these summits were becoming ridiculous. I expect so. What about "personal con-

tacts" among leaders helping them get on better? This overlooks the evidence that persoani contact is also the main cause of leaders getting

The papers

On balance, The Sunday Times said, the summit must be rated a success and unlikely to lead to th misunderstandings that followed the raisunderstandings that followed the Versailles meeting two year ago. The fact that the French and the Americans, who are so often at odds, reached a common view without compromising their principles, is a sign that the Western world is in a healthier state than many fear.

Observer's description of the summit's handling of such problems as famine and poverty. If Western leaders believe things are getting better they should share a little of that improvement with those for
